MASSACHUSETTS ARCHAELOGICAL SOCIETY BULLETIN
Published in four Numbers of one Volume each year, commencing
in October.

Note: Address all requests concerning membership to the Secretary; all orders for back Bulletin numbers to the Museum; mail Society dues to the Financial Secretary.

BRONSON MUSEUM
Tel. 222-5470

This, the Society Museum, is located on the 5th Floor of the Attleboro Trust Co. building, at 8 North Main Street, Attleboro, Massachusetts. Museum Hours are from 9:30 a.m. to 4:00 p.m. daily, Monday through Friday. Although this schedule is usually adhered to, it is wise to call the Museum before coming if you come from some distance. The Museum is also open by appointment at other times. Call the Museum Director, Maurice Robbins.

The Museum has extensive exhibits of stone implements, obtained for the most part from the Massachusetts area. They are arranged in culture periods identified in the Northeast, and cover a time extension of some 10,000 years.
INDEX TO VOLUMES 1 THROUGH 38

This inclusive index of Massachusetts Archaeological Society Bulletins volumes 1-38(3) appears in three distinct formats. An Authors Index lists all authors alphabetically by last name, followed by the titles of their articles in chronological order, with volume, issue number, and initial page reference. The Title Index lists all titles alphabetically except for the initial articles "the, a and an". The title is followed by the author's name and a volume, number and page reference. The Subject Index format is rather less obvious; it is extensive but not comprehensive. The subjects alphabetized were generally drawn from the titles or major topics of the articles, comments, letters and editorials referenced. Thus, some of the subjects in the list are touched upon, if only lightly, in articles not referenced to them. The Subject Index should help a researcher make a start into the MAS literature on a topic, but it will not exhaust it. For example: the references listed under "Early Archaic sites" include only those articles which deal entirely or mainly with sites of that period. Many site reports which refer only briefly to Early Archaic artifacts being found will not be listed under that heading in the Subject Index. The Index team hopes that users will appreciate the quandary they faced and accept charitably the simplifying decisions made.

The reference format [00(0):0] was selected by the Editor after consideration of several alternatives. It closely follows the format used by the American Anthropologist for its indices, and may thus be unfamiliar to MAS members. It offered substantial savings in space and set-up costs, while being unambiguous in form and thus easily checked for accuracy. Dates of publication have been omitted, at substantial cost savings, because they are implied by, and can be reconstructed from, the volume and issue number, and will be readily accessible to anyone looking up an item in back journals. Following a title or subject heading, the volume number is preceded by a comma and followed by parentheses; in series, it is preceded by a semi-colon [00(0):0]. The issue number is within parentheses and followed by a colon [00(0):0]. The initial page of an article, etc., follows the colon [00(0):0]. The concluding page is not listed.

This index represents the dedicated work of a number of individuals, beginning with its inception at Providence College in 1973. Under the direction of Dr. Carol Barnes, Charles Paxton, aided by his wife Loryn, compiled an Author Index on cards for all volumes through April, 1974. This list was cross-referenced by code to eighteen topical categories, from any of which reference could be made back to the author list. This substantial achievement was turned over to the present Editor in the fall of 1976, as a large set of index cards with a brief introduction and guide.

With the help of Steven Fuller, a graduate student at the University of Massachusetts at Amherst, the Editor reviewed the Paxton index with the intention of bringing it up to date and preparing typescript for publication. The review revealed a problem in the coded reference categories. Two categories--"Theory and Comparative Studies" and "Miscellaneous"--were very large in relation to other categories, and subsumed in their undifferentiated masses much of the most interesting material which had appeared in the journal. Consequently, Mr. Fuller agreed to undertake a subject index in a format intended to encourage thoughtful and thorough research use of the Bulletin. The result of these combined labors is offered here. The Editor acknowledges with grateful awe the work of the Paxtons and Mr. Fuller, while assuming full responsibility for the final format of the index and for any errors, of omission or commission, which mar its form or usefulness. In addition to the monumental work of the compilers, the task was aided and ultimately brought to completion by the help of the following people: Michael McCracken of Attleboro, Janice Weeks and Patricia Crosby of Greenfield.

LIST OF INSTITUTIONAL SUBSCRIBERS

The following institutions presently receive the Bulletin. Some are nearly charter members of the Society, others, very recent friends; therefore, their back files vary greatly in depth. Not all of these institutions make their holdings available to the public. Anyone wishing to consult journals in these repositories must make his own inquiry as to their accessibility.
