Bridgewater . . . undecided on student voters

Attorney General Robert Quinn released a legal memorandum on July 21 which stated, in essence, that college students should have the right to vote regardless of their place of residence. Quinn’s ruling sent an icy chill up and down the spine of every government official throughout Massachusetts. Quinn’s ruling paves the way for residence hall students to vote in the community where they attend school.

Quinn said the ruling is “merely abiding by the 26th amendment” to the U.S. Constitution which lowered the voting age to 18. “There is nothing new in my opinion,” he said, “except for this: the fact that an individual is a student, or residents in a dormitory, should not deprive him of the right to vote in a community.” He said registrars of voters should treat the 18-20 year olders exactly the way they have treated the 21 year old and older voters in previous years.

The Massachusetts Town and City Clerks Association has developed its own set of guidelines, expanding the meaning of the Attorney General’s wording to read “any present intent to leave the town when your work or study assignment is completed.”

Michigan and California Rulings

The Supreme Courts of California and Michigan have recently ruled in favor of student voter registration in college towns.

Michigan: The new Clement C. Maxwell Library was completed at a cost of six million dollars under the direction and with the constant encouragement of President Ronald B. Quinlan and Dean Harrington. Mr. Mcgowan told The COMMENT, the entire library will not be put into use until the new furniture and shelving are received. Delivery is set for early 1971, just in time for the first semester, and possibly for the beginning of the second. B.S.C. students will be able to utilize only the ground floor of the new building.

During that time equipment from the old library will be installed on the ground floor, and most activities will be carried on there. Eventually the ground floor will house back issues of periodicals and will also have a reading room. The microfilm reading room and group listening area, also on the ground floor, will be put to use as soon as the equipment arrives during the first semester.

There are eleven classrooms on the ground floor as well. These range in capacity from twenty to forty students with a total capacity of 325 students. According to Librarian Owen McGowan, these classrooms will be used immediately at the start of the academic year.

Crisis Avoided

Dean Lee Harrington, informed The COMMENT that there are fourteen classrooms and a 198 seat auditorium in the library with some 500 student seats all of which have been scheduled for full use for the next academic year.

New Maxwell Library Completed

by Ron Petrino

Bridgewater -- On September 13, 1971, Bridgewater State College opened a new academic year as well as the doors to its recently completed library building. That doesn’t mean, however, that Bridgewater students will have four floors to browse around or study. At least not for a while. For as Mr. McGowan, librarian, explained in an interview with The COMMENT, the entire library will not be put into use until the new furniture and shelving are received. Delivery is set for early 1971, just in time for the first semester, and possibly for the beginning of the second. B.S.C. students will be able to utilize only the ground floor of the new building.

During that time equipment from the old library will be installed on the ground floor, and most activities will be carried on there. Eventually the ground floor will house back issues of periodicals and will also have a reading room. The microfilm reading room and group listening area, also on the ground floor, will be put to use as soon as the equipment arrives during the first semester.

There are eleven classrooms on the ground floor as well. These range in capacity from twenty to forty students with a total capacity of 325 students. According to Librarian Owen McGowan, these classrooms will be used immediately at the start of the academic year.

Crisis Avoided

Dean Lee Harrington, informed The COMMENT that there are fourteen classrooms and a 198 seat auditorium in the library with some 500 student seats all of which have been scheduled for full use for the next academic year.

Explaining that one of the major problems facing the college administration over the summer months has been the completion date for the library, Dean Harrington remarked that, if the classrooms were not ready for occupancy I honestly could see no other solution except a postponement of our academic calendar.

The new Clement C. Maxwell Library was constructed over a period of four years at a cost of six million dollars under the direction and with the constant encouragement of President Ronald B. Quinlan and Dean Harrington. Mr. McGowan told The COMMENT. The architects of the huge edifice were Hoyle, Doran, and Berry of Boston and the builders were the Westcott Construction Company of Attleboro. It is now complete with the exception of finishing touches.

As noted earlier the major concern of the college administration over the summer had been the completion of the library building. Dean Harrington explained the problem in the following words: “As usual the target date for completion seemed to keep fading away from the dates which were suggested months ago by our Central Office engineers. Dates in June, July, and August came and passed without final acceptance of the building.”

“I am delighted and relieved to report that the ground floor of the building was taken over finally and officially by the college on Tuesday, August 31. At that precise moment our truck began to move books, which had previously been boxed by our student work force, into the ground floor of the new building. The shelving concern will begin the shelving installation this Saturday morning, September 4, and President Randall and I are confident that a library of some kind will be functioning by the opening of classes on September 13. It should be noted that we are deeply grateful to the Westcott Construction Company for their cooperation in these last hectic days of construction and for giving us what I believe is the most beautiful college library I have ever seen.

Library Layout and Facilities

The COMMENT asked Mr. McGowan to give a brief description of the layout of the building and the facilities which will be available when the entire structure is opened for use by the college community. The main, or first floor of the library, will, when operational, be entered from Park Terrace only, he said. Students will come into the large reception area, with a comfortable browsing room on the left and the library offices and a conference room on the right. Immediately beyond the entrance are the circulation desk and the two shellack offices, situated in the middle of the main reading room. They will be occupied by the reference librarian and the serials librarian.

Every floor of the library will have copying machines available for students, said Mr. McGowan. There will be a typing room on the first floor to which students may bring their own typewriters. An abundance of carrels for individual study will be scattered through the building. In addition to these, there are thirty small rooms which will be assigned on a short term basis to faculty members working on special projects.

Each floor has two student...
Remodeling Boyden Hall

The completion of the new Boyden Hall involved a construction project to occur on the campus during the summer. In addition to the regular project, the additional work included a complete renovation of the old building. Boyden Hall was occupied during the summer, with a significant amount of renovation work being conducted. The old building was demounted off and the new section was added on. The work included the replacement of all existing systems, such as electrical, plumbing, and heating. The new structures will allow the building to be used for a variety of purposes, including classrooms, offices, and common areas.

Over the summer, before students received their bills for the upcoming academic year, a group of resident students received a letter from Dean Harrington informing them that their accounts had not been increased by the Board of Trustees. The Resident Student Senate is concerned that students are being held responsible for increases that were not approved by the Board of Trustees.

The newly remodeled Boyden Hall is located at 123 Boyden Hall Lane. The project was completed on time and within budget, and the space is currently being used for a variety of purposes, including classrooms and meeting rooms.

The Board of Trustees of the Massachusetts State College System recently elected Mr. John Smith as the new president of Boston State College. Mr. Smith, who has served as the interim president since last year, will continue in this role until the Board has completed its search for a permanent president.

The Board of Trustees has approved the new academic year's budget, which includes increased funding for faculty salaries and student scholarships. The budget also includes funds for new technology and facilities improvements. The Board is committed to providing the best possible education for students, and this budget reflects that commitment.
**Home for Humanities**

Now that the Bridgewater campus has completed its first full-fledged semester, the question of a new home for humanities has become a reality. The History of Science, located in the new Science Center, has been completed and is now ready for occupancy.

The new building will provide additional classroom space for humanities, including a large lecture hall and several smaller classrooms.

The building will also include a lounge area for faculty and students, as well as a computer lab for research purposes.

The opening of the new building is a significant milestone for the university and will help to accommodate the growing demand for humanities courses.

**Bridgewater State College**

**Remodeling Boden Hall**

The remodeling of Boden Hall is nearing completion with the installation of new lighting fixtures and the rearrangement of the furniture. The new lighting fixtures will provide brighter and more even illumination throughout the building, while the new furniture arrangement will create a more functional and comfortable space for students.

The remodeling work is expected to be finished by the end of the current semester.

**Increased Fees for Resident Students**

The Board of Trustees has approved an increase in fees for resident students for the upcoming academic year. The increase, which will affect all residence hall students, is intended to cover the cost of maintaining the residence hall system.

The increase will be $170.00 for the upcoming academic year, bringing the total fee for residence hall students to $520.00.

**Additional Course Offerings**

The number of courses offered at Bridgewater State College has increased by 201 over the last three years. In 1969, there were 130 courses offered. This year, there are 351 courses offered.

The increase in course offerings is due to the growth of the student population and the expansion of the curriculum.

**Summer School at Bridgewater State College**

Summer school at Bridgewater State College will be held from July 1 to August 30. The courses will be offered in a variety of formats, including traditional classroom instruction, online courses, and self-paced learning.

The summer school will offer a wide range of courses, including courses in science, technology, education, and the humanities.

**Student Union Building**

The Student Union Building is scheduled to be completed by the end of the academic year. The building will provide additional space for student organizations and will include a large ballroom for events.

The completion of the Student Union Building will help to meet the growing demand for student space on campus.

**New Computer System**

The new computer system is designed to provide better service to students and faculty, and will include a new student registration system and an online course registration system.

The new system will also allow for more efficient billing and payment processes.

**Recent Developments**

- The completion of the new computer system is expected to improve student satisfaction and reduce administrative overhead.
- The new system will also allow for faster response times to student inquiries.

**Bridgewater State College**

Editorial
Standing Committees meet Tuesday

Finally, a new library

The Comment Sept. 8, 1971

The recently completed Chalcean building was originally scheduled to be completed by this date. The building was actually completed on December 10, 1970, and the dedication was held on December 21, 1970.

The new library will be an addition to the existing library and will provide additional space for the library's collection of books and periodicals. It will also provide a new reading room and a new reference desk. The library will be open to the public from 8:00 A.M. to 9:00 P.M. on weekdays and from 1:00 P.M. to 5:00 P.M. on Saturdays.

For many years the National Wildlife Federation has fought the destruction of America's wildlife and natural resources. But this year the Federation is planning to dramatize the deadly threat to our nation's wildlife through the destruction of the Annual National Wildlife Index. This index indicates that the ordering of equipment for the library has been delayed.

In the past, the library has been able to receive the necessary funds for the purchase of new books and periodicals. However, this year the library has not been able to receive the necessary funds for the purchase of new books and periodicals.

In an effort to remedy this situation, the library will be accepting donations of money and equipment. The library will also be accepting donations of used books and periodicals. These donations will be used to purchase new books and periodicals.

Senators Mike Gravel to Address Pax O Convention

WASHINGTON, D.C. - Senator Mike Gravel, the Alaska Democratic who is running for the presidency of the United States, will address the Pax O Convention in October. This is the first time that a presidential candidate has addressed the Pax O Convention.

The Pax O Convention is a national organization that is dedicated to promoting peace and nuclear disarmament. The convention is held annually in Washington, D.C., and is attended by thousands of people from all over the country.

Senator Gravel will speak on the issue of nuclear disarmament and will call for the elimination of nuclear weapons. His speech will be followed by a question-and-answer session with the audience.

The Pax O Convention is a non-partisan organization and is open to people of all political persuasions. The convention is free and open to the public.

Teach the Water: A Talk by Senator Mike Gravel

Senator Mike Gravel, the Alaska Democratic who is running for the presidency of the United States, will give a talk on the issue of nuclear disarmament at the Pax O Convention in October. This is the first time that a presidential candidate has given a talk at the Pax O Convention.

The Pax O Convention is a national organization that is dedicated to promoting peace and nuclear disarmament. The convention is held annually in Washington, D.C., and is attended by thousands of people from all over the country.

Senator Gravel will speak on the issue of nuclear disarmament and will call for the elimination of nuclear weapons. His talk will be followed by a question-and-answer session with the audience.

The Pax O Convention is a non-partisan organization and is open to people of all political persuasions. The convention is free and open to the public.

GOVERNMENT

The Department of Justice has released a report on the issue of nuclear disarmament. The report states that the United States is making progress towards the elimination of nuclear weapons.

The report also states that the United States is committed to the goal of a world without nuclear weapons. The report calls for the United States to lead the way in the effort to eliminate nuclear weapons.

The report is available online at the Department of Justice website. The website is: https://www.justice.gov
Editorial

Standing Committees meet Tuesday!

Last week, faculty and student members of the editorial board of the New Collegian met for the first time since the beginning of the fall semester. The purpose of the meeting was to discuss the new guidelines for the election of standing committees and voted on the first scheduled meeting of all the standing committees. In the past, the election of committees was usually done informally, and it was difficult to determine who was on what committees. By establishing formal guidelines, the intention is to ensure that everyone is aware of where committees exist and that they are elected in a more organized manner.

Just as important as the guidelines is the fact that all the various standing committees are meeting this quarter. All the committees were scheduled for a meeting on Tuesday, September 25.

On the E Q Index

For many years the National Environmental Policy Foundation has published the E Q Index, a compilation of proposals for national environmental policy. The index provides a comprehensive guide to the environmental policy preferences of the American people and serves as a valuable resource for policymakers and environmental activists.

The index is compiled annually and provides a snapshot of public opinion on environmental issues. It is widely regarded as a reliable and respected source of information on environmental policy preferences.

In addition to the E Q Index, the National Environmental Policy Foundation also publishes the "Pentagon Papers" on nuclear disarmament. These papers provide a detailed analysis of the nuclear weapons program and are a valuable resource for those interested in nuclear disarmament.

Finally, a new library

The recently completed library should be a great addition to the campus. It is located in the new sciences building, which was completed several years ago. The library will be a valuable resource for students and faculty alike.

The library will house a large collection of books and periodicals on a wide range of subjects. It will also be equipped with computer terminals and other technology to support research and study.

Touch the Water: Your Community's Water Sources

A water pollution bill which may become theenson of several months of debate in Congress was recently introduced by Senator Edmund Muskie. The bill is designed to improve our nation's water quality and protect the public health.

The bill includes provisions for the establishment of a national water pollution control agency, the enforcement of federal standards on industrial discharges, and the implementation of a national water quality index.

The index is a measure of water quality that is based on a number of factors, including the concentration of pollutants, the type of pollutants, and the location of the pollution source.

The index is intended to help policymakers and the public understand the quality of our nation's water resources and to identify areas where improvements are needed.

It is important to note that the index is not a substitute for direct observations of water quality. It is a tool that can be used to complement other methods of assessing water quality.

The index is a valuable resource for those interested in protecting our nation's water resources and ensuring that they are safe for human consumption.
WEISSMAN:

4. What plans do you have for the coming semester?

I plan to start working on a publication that I believe will be ready by the end of the spring semester. I think it’s already time to think about a possible summer project. I’d like to try to show my progress on this project and focus on developing my writing skills in the meantime. I also want to continue learning my studies and improve my understanding of the literature and the subject. Lastly, I’d like to try to contribute to the development of the project and see how it develops.

5. Do you have any comments you would like to make about the administration?

I think the administration is doing a great job. I see a lot of effort being put into the planning and preparation of the courses for the coming semester. The administrators are also responsive to student concerns and are always willing to help. I think the administration is doing a great job.

6. Do you have any suggestions you would like to make about the library?

I think the library is well-equipped with resources. However, I think the library could benefit from more space and more resources. I think the library should be expanded to accommodate the growing demand for resources. I think the library should also be increased in the number of sections to accommodate the growth in the number of students.

7. Do you have any suggestions you would like to make about the dining hall?

I think the dining hall is well-equipped with resources. However, I think the dining hall could benefit from more space and more resources. I think the dining hall should be expanded to accommodate the growing demand for food. I think the dining hall should also be increased in the number of sections to accommodate the growth in the number of students.

8. Do you have any suggestions you would like to make about the student union?

I think the student union is well-equipped with resources. However, I think the student union could benefit from more space and more resources. I think the student union should be expanded to accommodate the growing demand for resources. I think the student union should also be increased in the number of sections to accommodate the growth in the number of students.

9. Do you have any suggestions you would like to make about the administration?

I think the administration is doing a great job. I see a lot of effort being put into the planning and preparation of the courses for the coming semester. The administrators are also responsive to student concerns and are always willing to help. I think the administration is doing a great job.
Furniture and equipment to arrive early, 1972

### CAMPUS ON THE CAPE

Each semester for the last two years B.C.C.'s faculty members have enjoyed the frills of an array of new facilities. This fall the B.C.C. administration, in addition to the availability of an additional academic department, has been able to offer some of the state-of-the-art technology. Administrators are now in a position to offer a variety of courses and to provide students with a more interactive learning environment. The materials for this semester are now available.

### PRESIDENT'S LETTER ON ACCREDITATION

Last spring a committee of four members of the Board of Trustees, the Executive Committee, and the faculty met to discuss the possibility of accreditation. As a result of these discussions, the members of the committee recommended that the Board of Trustees consider the matter of accreditation. The Board of Trustees, after further consideration, decided to recommend the matter to the Executive Committee for further study. The Executive Committee has now recommended the matter to the Board of Trustees for final action.

BEARS 1970 HIGHLIGHTS

The college administration announced last week that the list for the indoor playing fields which were supposed to be ready only a few weeks ago was finally ready only later this month. The administration had hoped that the fields for the academic year would be ready by the middle of August. To try to get the fields ready sooner, the administration informed that the original plan was to spend about three-quarters of the $1 million dollars being raised for the indoor playing fields. The administration is now expected to receive up to $700,000 in state funds by July or August for the indoor playing fields. From a long-range plan for indoor playing fields, the administration is now expected to receive up to $700,000 in state funds by July or August for the indoor playing fields.

Bears Prepare For Opener

The Bridgewater State College "Bears" will have the toughest schedule in their storied year history of football. The "Bears" will face such formidable opponents as Boston State College, Mansfield (Mass.) State College, Frostburg (Md.) State College, Maine Maritime Academy, Nichols College, Nichols College, Grover City (Pa.) College, and Western Massachusetts State College.

Defensively only four starters from last year will be returning. Center and Captain Phil LeFavor will anchor the line. Ron Reardon at tackle will be the only other returning interior offensive lineman.

Richard Roa th will be returning as a wide receiver. Last season Roath led the team in scoring with five touchdowns on 27 receptions.

Vince Hickey at quarterback is the only regular returning in the backfield. Vince completed 72 passes for four touchdowns, but had 17 passes intercepted.

Help is expected on the line from Joe Connolly who was a regular defensive tackle two years ago and was tried as an offensive guard during Spring drills. Returning to the backfield are Allie, Finks, Day and John Egan. Kevin Hughes, who didn't play in his freshman year, looked good carrying the ball in Spring drills.

Outside linebacker positions will be handled by veterans Ed Cauley and Peter Higgins. Nichols backfield spot will be filled by newcomers Leslie Cogdill and Jim Vosuk.

A practically new secondary with plenty of potential will consist of centerbacks Jim Fiero and John Egan. Kevin Hughes, who didn't participate in '70 Junior College transfers, and freshmen are expected to bolster the "Bear" gridders.

Although there are many obstacles, the cry in the locker room will be "The Bears Will Be Back in '71."
