Students To Participate In Reappointment

Bridgewater – On February 24, President Adrian Rondileau, in a key administration to members of the college community, accepted the recommendations of the S.G.A. Council, the Faculty Council, and the General Faculty concerning student participation in the process of the reappointment of non-tenured faculty. Beginning this Spring, students of B.S.C. will have participation in an advisory capacity in the process of reappointment.

President Rondileau’s letter of one of the three parts. The first section involves modifications concerning the time schedule for implementation of the policy for this year as well as clearing up questions concerning the nature of student participation. The final section consists of a statement of the official policy.

A Brief History

The history of the recommendation date from June 2, 1969 at which time President Rondileau accepted the Policies and Procedures for a student reappointment committee to be submitted to the legislature without tenure, recommended to him at that time by the Faculty Council. He accepted that policy however “with the understanding that policies and procedures must also be developed for the appropriate participation of students which will be acceptable by both faculty and student.”

In Fall 1969, President Ron- dileau urged the S.G.A. president Robert Macioli to make every possible effort towards the goal of student participation in reappointment of non-tenured faculty. Macioli at that time hoped that procedures could be devised and a committee formed to back up his recommendations. What followed the Faculty Committee for the Student Participation was the recommendation that non-tenured faculty was formed in January 1970 under the chair- man of Mary Moore who was then a junior at B.S.C. By April 21, the final draft of the final proposal was ready for the attention of the committee. While not all of the members of the committee voted in favor of the proposal and the general consensus of the group that the proposal could make student participation feasible and should be tried if acceptable by other advisory boards by the President. The members of the committee were the following: Prof. Wayland Ridlon, Chair of the Faculty, Prof. Shoa, Greene, Barnett, Dean Mary Moore, Chairman, Tom Cofy, Sue Reserve and Ron Herr.

On March 18, 1971 the S.G.A. Council recommended to President Rondileau that the working paper proposal of the Student-Faculty Committee be accepted without change as official college policy. Four days later the Faculty Council voted to endorse the report if the committee for student participation in reappointment procedures and recommended the report to Faculty Council. Since that time the President of the college has studied the idea and has not until Feb. 24, 1971 has been accepted the procedure as policy.

Participation This Year

The second section of the President’s letter deals with the participation of the newly accepted policy this year. For this year only the chairman of the various committees will be responsible for coordinating the special election for the Student Departmental Non-Tenured Faculty Evaluation Committee. This committee will participate in the evaluation to take place in March and April of 1972. In a May new election will be held to replace the senior members of this committee. This committee will continue to function through next year but May at which time a new committee will be elected by the students. The coordination and implementation of the procedures will be for responsibility of the academic Divisional Directors.

Paragraph three of the second section of the letter states explicit that the Departmental committees set in an advisory capacity and that the input is merely one among, many other advisory inputs to the President which includes the General Faculty and the chairman. It is for the basis of all these sources of information that the President will make his decision as to whether or not he will recommend a faculty member who will be listed on the advisory role.

Official policy statement on page 2.

$8500 Minimum Salary Bill Filed

The Massachusetts Teachers Association (MTA) Boston Teachers Union and Massachusetts Federation of Teachers (MFT) support the bills that almost all of the Education Committee members strongly oppose.

Despite the seeming intensity of the discussions, all those involved had an air of familiarity about them—both sides knew the discussion wasn’t going to pass.

“We’re more than happy to talk about the amount of money we’re asking for,” said John Sullivan, speaker for the Massachusetts Teachers Association, after the committee members asked him a string of unwavering questions about the增加ing teachers over $8500.

Joining with Education Committee members to support legislation were spokesman for the W.B. S.C. School Committees and the Boston Teachers Union.

Teacher lobbyists were on the steps of the House. A big bill calling for the abolishing of tenure were discussed later in the house.

“If we are willing to talk to you,” the teacher said, “but formulated a minimum salary,” declared Rep. Frank Malagno (D-North Adams). No answer, but a laugh came from John Sullivan who was updating the tenure repeal bill for Mr. M.

The teacher’s representative insisted that when incompetent teachers are retained in a position in the rank of an administrator who have been the fair dismissal law rather than the tenure system.

In a related matter, Robert J. D. O’Brien, counselor at the Barnsfield High School defended a bill calling for granting tenure to guidance counselors for the state school counselors, in keeping school counselors from cutting guidance personnel from over burdened school budgets.

Bridgewater -- At the March 2, 1972 meeting of the S.C.A. Council the Council voted to accept President Rondileau’s proposed procedures for the selection of an academic dean. This acceptance allows the student body elected to the committee to participate in the committee’s work. Previous to this action the student body had been directed by the Council not to participate until the faculty had considered the Council’s own proposed guidelines which would have altered the President’s original procedures in three main ways. Now that the Council has accepted the original procedures, the search for a new academic dean can proceed without further delay.

The first meeting of the Academic Dean Search and Advisory Committee was held on February 24. At that meeting Dr. Jordan Fiore presented a statement concerning his concern.

Dr. Jordan Fiore presented a statement concerning his concern. In that statement he gave a brief review of the circumstances under which the statement was written. Of particular importance he points out is the fact that the committee serves as an advisory function and that the final selection lies with the President and the Academic Dean. Dr. Fiore’s statement is appended in the COMMENT.

It should be noted, again, that since the time of its presentation, the S.C.A. Council has revised its position and voted acceptance of the procedure.

Dr. Fiore’s Letter

Our deliberations must start with one important understanding – the regulations of the Board of Trustees and the State College of the President. We request that the president of the college shall nominate all administrative faculty and other members serve in an advisory capacity to the President which includes the General Faculty and the chairman. It is for the basis of all these sources of information that the President will make his decision as to whether or not he will recommend a faculty member who will be listed on the advisory role.

March 9, 1972
Student Participation in the Reappraisal of Non-Tenured Faculty

To collect and report the opinions of students concerning non-tenured faculty members who are being considered for reappointment, (There will be established in each department, a Student Departmental Non-Tenured Faculty Evaluation Committee.

I. Composition and Election

A. The student departmental committee is to be composed of five students who are junior or senior department majors. If no majors exist in that department, then five students are eligible for election. A committee may be elected by the candidates in separate departments or by the candidates in a department that have had at least, twelve hours in the subject area of the department.

B. The members of the committee are to be elected by vote of junior and senior departmental majors from nominations submitted by the majors. The members of the committee are to be submitted to the vote of the members and nominees to serve until the election in the following May.

III. The student committee is to be established by the General Faculty, however, if the candidate for evaluation of non-tenured faculty by students is the McKeachie form. If so, the student committee noted the proposals but had no say as to which one should be chosen.

The division directors have met and recommended to the student committee, the following procedure must be followed:

1. A form may be substituted for the McKeachie form, if agreeable to both the student committee and the candidate.

2. Should the faculty member agree to the use of the form, yet disagree to its distribution in the classroom, or should the faculty member and the student committee, agree to substitute upon the use of some suitable form for evaluation, the committee should cause a representative to collect data, using some method(s) which it deems appropriate. Among these methods are the use of a questionnaire, and a written statement upon completion by the student committee, written statements by students in the instructing courses. The method used was to accompany the final report.

3. Should the students agree to the use of the McKeachie form, or any other form, the division director or the student committee, may, upon the necessary number of forms within the Committee:

   a. Allow the distribution and completion of the forms in the classroom during the class time.

   b. Collect the forms and return them to the committee. This should be told that the form is available to any student who are absent from the class on the day of distribution.

   c. Should the committee prefer not to allow the use of an agreed upon form in his classroom, the student departmental committee shall assume responsibility for collection of the data.

IV. Tabulation

It shall be the responsibility of the student committee to tabulate the results of the forms as used, or according to these tabulations, in the form of a written summary, as well as the actual completed forms along with his tabulations. If there had any doubt as to which method to use the summary, the chairman would be the secretary of the committee.

V. Hypnosis Demonstrated

Hypnosis will be demonstrated as we discussed next Thursday, March 30th at 10:00 A.M. as the infal, Club Speaker Society, the demonstrations in the S.U. Conference Room. Professor John McPeek is a graduate of the Northeastern Graduate School Program in Experimental Psychology and did his undergraduate work in the same subject at Tufts University. He has failed to come to agreement with articles in Social Psychology and is a student in hypnotherapy at Medfield State Hospital and is an advocate in the field of hypnotherapy. He is currently engaged in research in Psychology at Tufts University. The Psychology Club is expected to meet at 10:00 A.M. on Thursday, March 30th, in the S.U. Conference Room. The program will feature a demonstration of hypnosis and a discussion of its applications to psychology and medicine.

CMC

Proposed

Concerned Elementary students at I.S.C. have formed a steering committee to try to get some action on the issues discussed on "Student Study Days." The steering committee has made up of two representatives from each grade grouping.

The proposal appearing on page 2 is the result of a change toward improvement. It calls for an amendment to the present policy, which allows freshmen and current freshmen (next year's sophomores) with the acceptance of the Student National Education Association, which is currently working with the steering committee, to be heard by the student council. It was a program of student, work and the SNEA has an opportunity to say what they would help the student council to do the choice of a student is one of the right direction.

The proposal was not a failing, but SNEA is confident that it will work. It was felt that it could become a reality. What SNEA is seeking is the right to express a preference in favor of the proposal? Please refer to the proposal and consider the following questions on your opinion using the accompanying "Yes, I agree with the proposal", "No, I disagree with the proposal", or "Return ballots to the COMMITTEE office".

WEEKLY INFORMATION COLUMN BY LILIANE ARNET

Q. In the Student Union, why do people have the right to smoke, yet cannot eat in different rooms? Smoke breaks old me older than a person eating.

A. The food and beverage regulations in the S.U. is a matter of sanitation, as well as possible detrimental effects to the building. There has been a steady increase in the number of students and faculty who have expressed concern to the Union, and new policies may be made only when necessary. The food and beverage regulations are especially for catered areas, where food storage would ruin the expensive menus. As for smoking, there was much discussion last year by the Board of Governors about prohibiting smoking because of cigarette burns on the rug in the lounge. However, it was decided not to prohibit smoking unless it posed a real threat to the furnishings.

Q. What is the difference between the two smoking areas?

A. Lou Perry said: "The smoke were to help reduce the smoke Wright, when the smoke is drained, the mess will be cleaned up, probably sometime next week when the smoke has settled and it is not windy.

Q. What is the procedure for using the copy machine in the SGA Office? Any student can use the copy machine, located on the second floor of the S.U. in the SGA Office, whether he is a student or faculty member working in the office (usually from 9 to 5). The SGA Office is open to everyone.

Q. Is a social education major with a minor in music. After I graduate, I would like to teach music in schools in the public or private sector.

A. According to Arthur Silva, President of the Senior class, the Chautauqua of the City is a formal dress establishment suggesting manners and good taste.

Attention Seniors

Degree application forms MUST be filled out IMMEDIATELY. Forms are available in the Registrar's Office and in the COMMENT Office.

Student Union Happenings

English Majors at 4 in S.U. 2. March 14: Mayor McGovern President Meeting at 10 in the Green Room Library Committee at 9 in Conf. 4.

There will be a meeting of all students interested in trying out for the softball team on Monday March 13th at 4:00 in the Room.

Thank you Regina M. Gross Assistant Professor

On Tuesday, March 7, the McGovern for President Committee met in the Green Room of the Student Union to discuss plans for campus organization, sub-committees, and the formation of a representative group for specific aspects of the campaign. It was also decided to set up an information table in the Student Union starting Monday, March 13 to Friday, March 17. The purpose of the table is to supply answers to questions that students may have regarding registration, the Massachusetts College Student Senate and McGovern. They hope all students will take an interest in this table. The next meeting has been scheduled for Tuesday, March 14, in the Green Room of the Student Union. Anyone interested in working or learning more about the McGovern for President Committee are urged to attend this meeting.

Aries
March 21 - April 20

Numerous contacts claim your attention and self-control this month. Decisions and new starts are favored, and any romance begun before the 11th will lead to a happy marriage. Your popularity is on the rise, seek what you deeply want without being too aggressive. Express yourself freely in speech, writings, and actions. A chance for luck and happiness through quiet methods and private influences. The Sun, ruler of your house of: romance, gives you signs on the 20th, causing you to be very demonstrative, affectionate, and loyal. You can rely upon your common sense to actually achieve new acquaintances. If you are free, you will be attracting a second partner but will take your time before making a final decision, and this may be made near the 24th.

If you are wed, Uranus retrograding in your solar house of marriage can bring some changes or uncertainty, but nothing too serious, as there are no adverse aspects to that planet this month; so relax and use your good mental powers to obtain greater mastery over your life situation. Show patience, tolerance, and a new understanding towards your partner. If your were born April 3 to 7, you feel the opposition of Uranus to your Sun; know that this month you will bring experiences, you need; you may need diversion of wills which will require a new attitude on your part.

You may find that you are not married to what seems to be a stranger. The truth is that the quality of your human relationships is being tested; do you have a good partner, but you may not realize this till later in the year. The wise will seek to learn this now and make adjustments.

Taurus
April 21 - May 20

You are favored by the planets this month and should be able to relax and enjoy life. (It can be a month of sudden expansion, love, and harmony.) Friends, especially young ones, are helpful; there are influences, a romance comes or an important decision is made. Be sure that whatever progress you make in love and happiness lies in your own self-realization and your own development. Venus, your ruling planet, enters your sign on the 6th, making you the center of attraction. Redefine your romantic interests and give them new impetus before the 11th for best luck. Many of you become engaged or marry on this date. If you are seeking a second partner, you should find him, perhaps on a trip, through friends, at church, higher educational classes, especially if you were born April 21 to 30, so Jupiter, the planet of legal propinquity is in good aspect to your Sun. Some of your emotional joy may be derived in attending an art exhibit, a musical play, or a special dance program in which a youthful friend participates. (Here is a new streak in your nature, and the wish for romance may be almost irresistible as you see the common meaning of beauty open unknown height, realizing it can be yours to have and to hold.

If you are wed, the actual loss of Venus indicates harmonious social attainments. Your partner's true love for you overshadows the importance of all other wishes, as he seeks to bring additional happiness into your life through music and other forms of recreation. His mind is generous as he seeks to improve conditions around you. Line up your path, for this month, but be secretive about them, do not discuss things until they are pretty well "set" as reserve will serve you and yours best.

Gemini
May 21 - June 21

The frequent opportunities to spend quiet and relaxing hours without interference can be a sheer delight after the 6th, when Venus enters your solar twelfth house in wonderful aspect to Jupiter in your solar eighth house. The joy you derive from romance may be among your most cherished reconciliations. Some may be completely satisfied to be alone, especially if there has been a forced set of separation as your Sun makes you go on a long journey or some other important event calls for a temporary halt in orderly affairs. Regardless, all boxes and wishes will be put to their proper place, for Mercury, your ruling planet, is favorable to your Sun, and Uranus, who is marking time, will be a force which again begins its wonderful, thrilling aspect to your sign from the marriage sign, Libra. That is when wedding bells ring loud and clear. Saturn in your sign gives patience, stability, persistence, and concentration, all of which will be helpful in your private life.

If you are wed, you may run into patches of fog in your partnership affairs, for Neptune occupies your solar seventh house, especially if you were born May 24 to 31, as Neptune opposes your Sun. You might be less sure of your ground. Learn to lean in instinct and intuition. The partner's income should be improving, and his mind is on children and ways of making you happy, so there is no problem there. Don't spend time dreaming of an ideal mate, for you already have one.

Cancer
June 22 - July 23

The most practical of your love life. Your emotions and passions are intense, but they represent something that is now natural for you. Your appeal to the opposite sex is physical, so be sure to concentrate on your body and its adornment. Neptune in your solar sixth house, which rules clothing, tells you to wear form-fitting lines of perfection that please you. A romance comes into full bloom near the 11th, a time for a happy engagement or making a wedding bells ring. Those of you who marry on the 11th do so under a Venus trine Jupiter aspect, which indicates luck and happiness follows. This is the time to marry, if you do so your partner. Some of you will find romance with a friend, among groups, through a friend; so busy in this department of your life.

If you are already wed, you have smooth sailing in marital affairs; luck seems to come to your partner and makes him demonstrative, affectionate, and loyal. You can rely upon your partner's true love for you overshadows the importance of all other wishes, as he seeks to bring additional happiness into your life through music and other forms of recreation. Your partner's health and work in us satisfactory or turbulent, you may suffer illness or an accident near the 1st. There is a little drawback - some of you will have trouble finding a home or suitable apartment; some of you may have a hard time finding a partner.

Leo
July 24 - Aug. 23

You become serious-minded as Venus forms its square aspect to your Sun. Some of your face interference in love, while some of you must meet a challenge. Your passion gives you the illusion that you consider yourself a superior person, but this is a month when you should adapt yourself to different circumstances and people. This one you are interested in does not quite come up to your high standards, or so you think; but look again. This person is honest, hard-working, sincere, and mysterious. Defer to him if you have been talking him for granted for too long, especially if you were born July 28 to 31. If you are still searching for your ideal, you should take part in some altruistic work in which you believe, and endeavor in social work; and if you have a contact person whose interests are akin to yours. You can take advantage of this association, and if you are a Leo, this can lead to additional contacts with friends and neighbors; happiness to you. You will become more amiable in social life, and your contact may deepen, and a new relationship with the virile or attractive partner. An older friend may suffer illness or an accident near the 11th.

With Uranus, ruler of your home of partnership, in your solar third house, in good aspect to your Sun and your partner's Sun, there is great love and harmony. You and your partner have the power to see new lines of development, and you will both change together, in a very satisfactory role. Your decisions and new starts are favored, and any romance begun before the 11th will lead to a happy marriage. Your popularity is on the rise, seek what you deeply want without being too aggressive.

Virgo
Aug. 24 - Sept. 23

An engagement or marriage is possible till the 11th, as charming Venus smiles at you, and do you with radiant happiness. You should be having the time of your life when Venus makes its wonderful aspect to your Sun and also to Jupiter, now placed in your house of true love. Engagement rings should be of generation that you attract the one your heart desires. This is also a very good proof for catching up on social engagements. But in any case, there is a little drawback - some of you will have trouble finding a home or suitable apartment; some of you may have a hard time finding a partner.

If you are wed, your love of family or business problems, while some of you make better ties with, strangers or those living at a distance. There is need to keep a watchful eye on parents; one may be ill or soon will have some illness. Some of you will have problems with flooding, dampness, gas, or mold on property. If your home is a home, be sure to pay attention in the condition of the roof, for Neptune often indicates a roof that leaks. Look also at the foundation. Your greatest luck and happiness comes through children or a hobby you might have.
For March 1972

Libra
Sept. 24 - Oct. 23

Sagittarius
Nov. 23 - Dec. 21

Scorpio
Oct. 24 - Nov. 22

Capricorn
Dec. 22 - Jan. 20

Aquarius
Jan. 21 - Feb. 19

Pisces
Feb. 20 - March 20

If you are an active, born fighter in the midst of an active year, you are busy fighting your way through the world of experience. You will find that the unexpected happenings, as well as the everyday happenings, are putting you in a hurry to get things done. It is best to keep your head up and your spirits high. Do not let yourself be discouraged by any setbacks or failures. Keep plugging ahead and you will eventually succeed.

Sagittarius: Your spirit is in a mood of adventure and discovery. You are eager to explore new areas and take on new challenges. It is important to remember that you are not alone in your quest for knowledge. Others will be eager to assist you and help you achieve your goals.

Scorpio: You are in a period of intense emotional and spiritual growth. It is important to listen to your inner voice and trust your instincts. Do not be afraid to take risks and make decisions based on your own convictions.

Capricorn: You are in a position of great power and influence. It is important to use this power wisely and ethically. Do not be afraid to stand up for what is right and to speak out against injustice.

Aquarius: You are in a period of great creativity and inspiration. Use this time to express yourself in new and original ways. Do not be afraid to take risks and try new things.

Pisces: You are in a period of great change and transformation. It is important to trust your intuition and to follow your heart. Do not be afraid to let go of the past and to embrace the future.

Teacher Surplus Stirring Concern

In Education Schools

by Larry Von Dyne-Chicago

Schools of education, which stepped up their output during the last 25 years to keep up with a widely publicized "teacher shortage" today, are facing a completely different phenomenon - a "teacher surplus." As a result, some institutions are curtailing their enrollments through selective admission. Many others, however, are relying on innovative measures, counseling some students out of further enrollment as they sort through the surplus.

Nearly everywhere the surplus is a source of concern. Indeed, it was the major topic at the annual meeting of the American Association of Colleges for Teacher Education. Clearly, as one observer put it, "The farmers are uneasy about the size of their crops."

They are uneasy in Illinois, in that fact, that the board of higher education has recommended a 10 to 20% reduction in the output of new teachers who are at six of the state's public universities. It has also urged a total phase out of undergraduate teacher training at the Chicago Circle and Chicago Urban campuses at the University of Illiniois, a recommendation that has set off a controversy between the board and the university.

Tuition Waivers Abandoned

The legislature's attitude toward teacher education is clear. Last year it abolished a state program that encouraged entry into teaching by giving tuition waivers to education majors. The legislatures in Florida and Maryland and New Jersey have taken similar action.

The reason for such measures is obvious. This year, says the National Education Association, an estimated 250,000 new teachers will compete for only 125,000 jobs nationwide; four years ago, there were 175,800 vacancies but only 175,000 new graduates.

This surplus, despite a continuing need for minority teachers and shortages in some specialties and locations, will make job hunting for this years class the toughest in recent history. What's worse, says N.E.A., the oversupply could grow to as much as 250,000 by 1978 if nothing is done to create more jobs or to limit access to the teaching profession.

The problem is a really a dual one - a shrinking demand and an expanding supply. School Enrollment Leveling Off

Enrollment in elementary schools, and secondary ones, which has been growing rapidly since World War II, is beginning to level off. It is even expected to begin dropping next fall.

Indeed, votes in many communities, exasperated by high property taxes, have begun reducing requests by administrators and parents for additional facilities.

At the same time, schools of education have been accepting more students and churning out new teachers. Last year, more than a third of all senior college graduates had enough credits for teacher certification.

Most Schools Still Tight

The COMMENT March 9, 1972

Although some institutions believe the trend warrants cutbacks like those recommended in Illinois, most appear to be sitting tight. "The picture isn't clear enough for most of them to act decisively," says Joel Burdin, associate director of the AACTE.

Some educators believe for example that the recent surge in enrollment once the economy improves. Others think that a restructuring of public school financing to include new federal dollars would open up new teaching jobs and still others think that there is a budgeted market for teachers outside the schools in day-care centers and social service agencies.

Some believe that the expected drop in school enrollment will be only temporary and that to curb the problem of teachers now would lose the schools threatened a few years from now.

Leo J. Shapiro, a Chicago sociologist who has studied the school personnel has said that "A real problem may develop if those actions to curb the surplus are effective. By 1980 we will be screaming for teachers."
## SPORTS

### WOMEN'S BASKETBALL

Keene State Women's basketball team was the twelfth victim of the BSC squad as they were defeated 63-44 in Kelly Gym. Leading the way for Bridgewater were Cecile Demarco with 15 points, Cathy Freytag with 14, and Karen Donaldson with 12. Sue Baptiste also played a big game for BSC as guard and offensive pick up 18 points.

The first period started off poorly for both teams. However, Karen Donaldson began to hit and Bridgewater to a 14-6 score over BSC. BSC played a strong second quarter as they scored 13 points and allowed Keene 12. Good defensive play by Cecile Demarco helped BSC maintain a 39-31 lead over BSC.

The third quarter proved to be BSC's finest as they collected 26 points. Susan Baptiste and Cathy Freytag chipped in 5 points apiece while Cecile added another 4 points. BSC threatened with 14 points but they trailed at the end of the third 46-31. In the final stanza BSC chalked up 13 tallies and held Keene to 9 as they heat Ke 62-44 on route to their 11th season victory.

### WOMEN'S GYMNASTICS

The BSC Women's Gymnastic team gained another exciting victory March 1, at a tri meet with Westfield and Salem State Colleges at Westfield State. The final score was 54.8, Salem 56.35, and Westfield 36.25.

After the first two events, floor exercise and side bar vaulting, BSC was 3 points behind Salem with Westfield trailing BSC. In the second half of the meet, the side bar was the team's home. After the balance beam event, BSC had gained points to put them 4 points in front of Salem. This was because of the fine performances by Janet McGarry and Naysa Miller.

There were 4 events in which BSC competed. All the girls performed superlative. Highlight scorer of the meet was Naysa Miller with a 7.3 on her floor routine. June Zapal was high on giant cartwheel vault. On the balance beam, Janet McGarry and Naysa Miller were leading with a 6.6 on her routine and Naysa Miller came through again with the high score on the uneven bars, 6.5.

The gymnastic team's record now is 9-4 with 3 more teams to meet. Their next competition is home, March 10 at 6:30 p.m. with Boston State and Rhode Island College. Come and support our girls.

### BOWLING

WHA: Girles: Stop and read this! There is a hot tip going around campus that there is FREE. (I'm sure that caught your interest) bowling at a hole lanes in town. So bring your college I.D. along and try your skill in town it's so far and get into the WHA Bowling Tournament. There's still time to sign up. There will be awards and trophies for the winners. Even if you're not bowling pro (not many of us are) you can come on down to bowl a few strings for a good time. Remember it's Monday's and Wednesdays at 4:00 P.M.

## Varsity Tennis

The 1972 edition of Dr. Henry Brown's varsity tennis team is now preparing for its season opener against Bellingham College on Patriots' Day, April 19. The team's players, now into their fourth week of practice at the Dartmouth Indoor Tennis Courts, will have their work cut out for them if they hope to better last year's record of 3-4.

Originally planning on losing one player from last year's squad, the team has had to absorb the loss of last year's r.v.s one and two players due to personal reasons. Just how well this year's team will respond to these setbacks will depend on this year's crop of freshmen, quite a few of whom have been most impressive, to date.

These returning for another year of play are Ron Kendall (Capt.), Frank Cullen, Nagy 1-2, Pinski Fans 3-4, and Joe 2-3.

EXHIBITION

Keene State Women's Tennis, which gained 6 points to put them 4 points in front of Salem, this was because of Maier's asking all interested, all a crack at the coach himself.

Final Standings In Mens' Intramural Basketball

**EXHIBITION**

- **WHA: Girles:** Stop and read this! There is a hot tip going around campus that there is FREE. (I'm sure that caught your interest) bowling at a hole lanes in town. So bring your college I.D. along and try your skill in town it's so far and get into the WHA Bowling Tournament. There's still time to sign up. There will be awards and trophies for the winners. Even if you're not bowling pro (not many of us are) you can come on down to bowl a few strings for a good time. Remember it's Monday's and Wednesdays at 4:00 P.M.

Introducing a new kind of beer. Maximus Super.

Maximus Super is not an ale or a malt liquor. Yet it's very different from ordinary beer. One can and you'll know just how different Maximus Super really is. You'll also know how we arrived at its name.
