The COMMENT
Bridgewater State College will conduct a six-week summer institute for 20 secondary school teachers of sociology beginning July 14. It has been announced by Dr. Morgan C. Brown, professor of sociology and director of the Department of Behavioral Science. The institute supported by the National Science Foundation, has two goals:

1. To introduce sociological concepts useful for a scientific understanding of the fundamental structure of society.

Beauty Makes It With A Beast At BSC

This marks the 5th year of Bridgewater State College's popular Children's Theatre production. The play has been selected is the musical version of BEAUTY AND THE BEAST by Disney and Wallace Van Tassel. D. II. and under the direction of the Speech and Theatre Department. A adjoining new support has been initiated by Professor Levine in that the original music score has been transposed into rock music to be played by a rock ensemble for all performances.

The production's new governor, John F. Buoy, has departed from a permanent setting to change the magic and fantasy of a child's fairy tale.

Comes to be offered an Interim Grant.

New Boards of Trustees Proposed for State Colleges

1972 that call for a post secondary education planning commission.

The technological Institute and Southeastern Massachusetts University will be eliminated in an effort to save a portion of the $385 million in annual operating costs for the lay policy and governing boards.

Five regional education boards, each consisting of 15 members, will govern the state colleges in the following manner:

* Region II - University of Massachusetts at Lowell, Northeastern University, UMass Lowell, Massachusetts State University at Amherst, and Western Massachusetts College.

* Region III - Lowell State, Salem State, Middlesex Community College, North Shore Community College

* Region IV - Southeastern Massachusetts University, Bridgewater State, Mass. Maritime Academy, Bristol Community College, Massachusetts College of Liberal Arts, Massachusetts Institute of Technology, and Westfield State College.

* Region V - University of Massachusetts at Boston, Northeastern University, Massachusetts Institute of Technology, and Westfield State College.

Financial Aid: ANNOUNCEMENT

For the 1973-74 academic year, the Office of Financial Aid will add to the current financial aid packages and offer additional opportunities to students. New options include: scholarships, grants, and loans. These new opportunities will be made available to students who have received financial aid in the past and to those who are new to the University. In addition, the Office of Financial Aid will be offering a number of new programs designed to assist students in meeting their financial needs.

Catholic Center

Beginning March 20, there will be a Letters Series each Wednesday evening during Lent. The Catholic Center will be open for prayer and discussion at 6:30 PM and the Liturgy of the Hours will be said at 8:00 PM. All are welcome to come and join us in prayer and meditation.

Film Festival Presentation

An exciting Academy Award winning feature film from Samuel Goldwyn presents starring James Mason. Here's a film that you won't want to miss! "How Green Was My Valley" is a classic film that will be shown at 2:00 PM and 7:30 PM on Sunday, February 17th at the Catholic Center.

An Interview With

Chris Swanson

The following questions were posed in a recent interview with Chris Swanson from the Chemical Department in the Catholic University of America.

Q: What is the most important aspect of their work?

A: The most important aspect of their work is the ability to communicate. Communication is key in any field, but especially in the sciences.

Q: What are some of the challenges that they face in their work?

A: One of the biggest challenges that they face is keeping up with the latest research and developments in their field. They must constantly stay ahead of the curve in order to be successful.

Q: What advice do they have for students interested in pursuing a career in this field?

A: My advice to students interested in pursuing a career in this field is to get involved in research as soon as possible. It's important to gain as much experience as possible, and there are many opportunities for students to do this through internships and undergraduate research.

Q: What are some of the most exciting developments in their field right now?

A: Some of the most exciting developments in our field right now are the use of artificial intelligence and machine learning in chemical research. These tools are allowing us to tackle problems that were previously too complex to solve.

Q: How do they spend their free time outside of work?

A: In their free time, they enjoy spending time with family and friends. They also like to travel and try new restaurants.

Q: What is the most rewarding part of their work?

A: The most rewarding part of their work is the sense of accomplishment that comes from solving a difficult problem. It's incredibly satisfying to be able to take something that is complex and make sense of it.

Q: What do they enjoy most about working in their field?

A: What I enjoy most about working in my field is the opportunity to work on problems that have a real impact on society. It's rewarding to know that the work that we do can make a difference.

Q: What is the most important lesson they have learned in their career so far?

A: The most important lesson I have learned in my career so far is the importance of collaboration. Working with others is key to success in any field, but especially in the sciences.

Q: Do they have any final words of advice for students interested in pursuing a career in this field?

A: My final piece of advice for students interested in pursuing a career in this field is to never give up. It can be challenging, but if you stay focused and determined, you can achieve great things.
Review: The Making of a Psychiatrist

By Ruth Barse

Before I begin I have a kind of engrossement to make. I'm really not as much of a reader as I may sometimes seem. I only appear that way when a situation is very threatening to me. It's one of my defenses against being hurt, other people being hurt as well. Pain means nothing to anybody else.

Yeah, right. I remember thinking as I read the first few lines of Dr. Viscott's recently published book, The Making of a Psychiatrist. The gap between his words and my own is like a gulf I can't cross without some kind of incident. He, on the other hand, is skilled at identifying his own, letting go of them, and running up the land with no malice at all. I would like to think of myself as a person who could do the same, but the truth is that I have never been able to do it.

For my mind, I was really enjoying myself. How wonderful to possess such a great perception! And since the book was giving me such an excellent opportunity to find out, I continued reading, and eventually finished, turning over to read one of the most fascinating, hilarious, and passionate books I ever read. I'm afraid that the seducing feeling I've been experiencing during the last few weeks will inevitably come from it. I'm sorry, but it is certain that this and every other book I read are of the utmost importance.

To the Reader:

I am sure that you have heard of my recent book, The Making of a Psychiatrist. It is a true account of my life as a psychiatrist, and it is my hope that it will be of interest to you. I have written it in a humorous and straightforward style, and I have tried to make it as readable as possible. I believe that it will be of interest to all readers, and I hope that you will enjoy it.

The book was written over a period of several years, and it contains many of my own thoughts and experiences. I have tried to keep it as accurate as possible, and I have tried to be fair in my presentation of the facts. I have also tried to show the reader how I think and feel about these situations, and I hope that you will find it interesting.

The book was published by the University of Chicago Press, and it is available in most bookstores. I hope that you will buy it and read it, and I hope that you will enjoy it as much as I have.

Yours truly,

Dr. Viscott

The English Dept.
With love I call to thee,
I'm left alone to grieve,
Is that it in my soul to care?

The Telescript...

To the Student Center:

You have heard too many times from your friends that you should be studying for the test. However, as you know, the test is not the most important thing. It is the process of learning that is important. You should enjoy the learning process and not just look forward to the test itself.

Good One. But...

By Bruce Meyer, United Press International

Say you were a member of a well-known rock band that had been around for ten years. Say you had long since put in the "good once, but past their-prime" category. Say you came up with something new—-a new sound, a new look, a new image.

And say you came up with something new—-a new sound, a new look, a new image.

But is this only a very small sampling of the repertoire one could help experiment in music? The band members are more than welcome to use their own unique flair in any way they please. After all, they are the ones who have the best chance of being successful, and they have the best chance of getting the most attention.

But one thing that makes my opinion of myself, finally, however, Dr. Viscott emerged from a discussion of the role of the psychiatrist in society. He, a very small person, had always been in the best position, giving Duke a fairly outspoken opinion of himself and his own worthiness. The group seemed to go along with the singer's point of view, and the group seemed to get the point of view.

I should go into childhood psychodynamic. You'd write, "It would be, but I just couldn't imagine myself being a part of myself."

But is this really the case? I mean, we all have a past, and it's part of our identity.

What would you do for a follow up? You'd try to capture exactly the same feel as you did with the hit, of course. And that is precisely what the Hollies have done with their latest, which is called "Romany Love Song."

"Romany Love Song" is in every way a sequel to a sequel album to "Distant Light," which contained the first Hollies hit single in a long time. "Long Cool Woman in a Black Dress," which is just one single is on an "Distant Light" category.

The music inside is mellow and smooth, of course. The Hollies have always been mellow and smooth. But there's also that heavy dose of Rock and Roll Fund. that made "Distant Light" popular with a younger set of album buyers.

There's even a clear sequel to "Distant Light," a tune called "Grown-Up Heartbreak," which features the same icy guitar work and muted, hollow drumming ..

One of Dr. Viscott's patients, an eleven-year-old ghetto black named themselves, but, students who will benefit not just from the thought and hard work of these students in the future, I am, of course, willing to lend my full support in any way possible. I am sure that the Education Department is open minded enough to listen to the suggestions of earnest student.

Is parking in Afghanistan.

Is that those are my books in your

The World famous Howard University Gospel Choir will perform Sunday, Jan. 26, at 8 p.m. in the Bridgewater State College Student Union Auditorium.

The Workshop choir is being brought to Bridgeview by the organization of Afro-American Students in part of the observance of Black History Month.

The half-hour choir, which performs with six other choirs, will present a program of Gospel music. Tickets will be sold at a reserved seat basis from 9 to 9.30 on the State Student Union Auditorium.

The concert is open to the public and to other students. No place orders will be accepted.

The Afro-American organization students are Cape Cod of BOSTON, president, Boston University, and the Afro-American Student Federation of New York, New York, New York.

Dr. Viscott introduced a subsection, examining, analyzing, and sometimes shifting, world of the book. The book was giving me such an excellent opportunity to find out, I continued reading, and eventually finished, turning over to read one of the most fascinating, hilarious, and passionate books I ever read. I'm afraid that the seducing feeling I've been experiencing during the last few weeks will inevitably come from it. I'm sorry, but it is certain that this and every other book I read are of the utmost importance.

The book was published by the University of Chicago Press, and it is available in most bookstores. I hope that you will buy it and read it, and I hope that you will enjoy it as much as I have.
Don Nelson

Visits BSC

Over the years the Cullars have had a hearty sort of "whiff" for whatever is fine in taste, whether in the form of a book, a fine meal, or indicating that the book is ready for a bite, and when the book is done.

One Nelson has filled this role for the past five years with the traditional quality of a man who has the most recent贯通or... John Toffield, Frank Moores.

After breaking all the records in college, two men joined the Chicago Blackhawks, respectively, in Chicago and New York. College Giants, and one in the Boston BSC, and one in the University of Chicago.

The meeting was on the evening before the start of the 1964 season.

Continued from Page 1

were more than five years old. Dr. Johnson's infor-

mation appears to be in-

consideration with the facts stated in paragraph two. It was not until August of 1967 that plans for it were submitted.

The information, incident-ally, this plan was "canc-

eled because it was necessary to go out for business in order to visit the obligation is for the students, rather than "tricking them around for themselves."

"Inter are many and we are few," as stated by Dr. Johnson, was the general sentiment reflected in the objection raised. Robert Williams, a member of the School Committee and one of the opponents in the license, criticized the administrators' presentation as "pie-in-the-sky rhetoric and nothing more." The campus appears to be above the law, "we will fight." No Commit-

tee of the Board of Selectmen was willing to step down to his former position of executive vice-president when his contract expires in July 1974.

Reprongin Lovell Tech on the merger agreement were Provost Less Regoan and Student Council President Jerry Bradford.

Although merger brings no immediate dollar savings, over the long run the Commonwealth can improve instruction and still effect economies." Shaddy stated that the merger would allow opportunities for the state to build up one strong library and a single strong program in business management and business administration. The merger would allow for students to obtain additional courses easily in non-related fields as well as improving quality offered.

The merger is approved by University President Daniel O'Leary, who is nearing retirement age. UTT's President Everett Olsen, then recovering from a heart attack said that he would be willing to step down to his position of executive vice-president when his contract expires in July 1974.

LTI-LSC Merger

Recommended

A special study commission headed by former Rep.

Paul Sherry of Lowell has recommended that Lowell Technological Institute and the Lowell State College merge

into a single university. If all goes as proposed, a University of Lowell will be a reality no earlier than July 1, 1974 and no later than July 1, 1975. This will have to be approved by the State Legislature, the Board of Higher Education, and Tech's and State's respective Board of Trustees.

Since Lowell State is governed by the State College

Board of Trustees, the committee has recommended that once merged, the University be governed by a Board revupped from Tech's present Board of Trustees. Also, it is proposed that a temporary planning board be set up which would be composed of students, faculty, and alumni from each school to study the merger details.

The report was announced by Secretary of Educational Affairs Joseph Cronin four weeks ago. In the war room, he is expected to present his proposal for cutting down theper year of the Massachusetts higher education system. This consists partly of the state colleges scattered throughout the state, which were organized primarily as teacher training institutions. The state college system is presently evaluating its education science curriculum.

Advantages stated in an LTI-LSC merger are not primarily financial for the Commonwealth according to Cronin, but is primarily academic. "Although a merger brings no immediate dollar savings, over the long run the Commonwealth can improve instruction and still effect economies." Shaddy stated that the merger would allow opportunities for the state to build up one strong library and a single strong program in business management and business administration. The merger would allow for students to obtain additional courses easily in non-related fields as well as improving quality offered.

The merger is approved by University President Daniel O'Leary, who is nearing retirement age. UTT's President Everett Olsen, then recovering from a heart attack said that he would be willing to step down to his position of executive vice-president when his contract expires in July 1974.

LOSE 20 POUNDS IN TWO WEEKS!

Former U.S. Women's Blue Team Defeat the iron curtain off means the U.S. Women's Alpine Team members go on an "Iron Diet" after the World Cup ended in a 1-1 tie. That's right - 20 pounds in 14 days! The pack of the diet is designed to burn 750 calories a day for 14 days. After the first week, the diet can be decreased to 500 calories a day. The diet is high in protein, low in fat, and has all the necessary vitamins and minerals. The U.S. Women's Alpine Team has been on the Iron Diet for 10 days and has lost an average of 14 pounds per day. The team members have been training hard in preparation for the World Cup, which begins next week. The team will be competing in the slalom, giant slalom, and Super G events. The U.S. Women's Alpine Team is one of the strongest teams in the world and is expected to do well in the upcoming World Cup. The team members are dedicated to their training and are committed to giving their best in the World Cup. The Iron Diet is a great way to lose weight quickly and safely. If you are interested in trying the Iron Diet, please contact your local gym or fitness center for more information. Don't forget to consult with a doctor before starting any new diet or exercise program. Good luck and have a great time at the World Cup!
