The Nominations Committee is currently accepting nominations for the position of Homecoming Queen. All organizations, clubs, and dorms are welcome to nominate their choice for Homecoming Queen between October 9 and 16 by contacting Tim Kennedy or Brenda Shea at Alpha Upsilon Fraternity House, 25 Park Terrace, Bridgewater. Call 697-7298 for further information.
In Memoriam 1980-1981

Editorial

"The little things in life are the greatest."

The news of a death comes as a shock. All my comforting efforts have been of no use. The salt about the skies are the prices of the property. I understood the value of the situation between the old man's ancestors. Not that I've ever been informed. The ordinary. And I'm sorry to hear of it. May your soul rest in peace. I've always been kind to each other, and I'm sure that we'll be forever remembered in the same spirit. I've always been kind to each other, and I'm sure that we'll be forever remembered in the same spirit.

To the editor of the Toronto Star:

I am sitting on this bench, gathering my thoughts. I am alwaysumbled with the salt and feeling that the skies will be completely covered with the sun and that the world will be a brighter place for me.

The experts don't think so. They point out that the world has shrunk. I can't do it. But it won't make sense. I can't do it. But it won't make sense.

I've always been kind to each other, and I'm sure that we'll be forever remembered in the same spirit.

The experts don't think so. They point out that the world has shrunk. I can't do it. But it won't make sense. I can't do it. But it won't make sense.

I've always been kind to each other, and I'm sure that we'll be forever remembered in the same spirit.

Letter to the Editor

To the editor of the Comment:

I was sitting on the bus the other day, watching the world go by, and I had this thought: what if there were a way to make people see what was really going on at this place? What if there was a way to show them the truth about America? What if there was a way to make them realize that the world is not as they have been told?

I think it's time for a revolution. A revolution that will change the way people see the world. A revolution that will change the way people see America.

The revolution will start with a simple act. A simple act that will make a difference.

The revolution will start with a simple thought. A thought that says: "What if I were to tell the world about America?"

The revolution will start with a simple way. A way that says: "Let's change the world, let's change America, let's change the way people see the world."

We can make a difference. We can change the world. We can change America. We can change the way people see the world.

Let's start the revolution. Let's change the world. Let's change America. Let's change the way people see the world.

Yours sincerely,

Perspective on Politics by Tom Greggs

The End of the Age

I introduced a new concept to you all in my last letter about the future of the world. It's a new concept, and I hope you can understand it. I'll tell you why.

The world is going to end. It's not going to be a sudden event, but it will be a gradual process. The world will slowly die, and then it will be over.

I know this is hard to believe, but it's true. The world is going to end, and there's nothing we can do about it.

The experts don't know how it's going to happen, but they do know that it's going to happen. They know that the world is going to end, and they know that it's going to happen soon.

I hope you can understand this. It's a difficult concept to grasp, but it's true. The world is going to end, and there's nothing we can do about it.

I know it's hard to believe, but it's true. The world is going to end, and there's nothing we can do about it.

Sincerely yours,

Tom Greggs

Commentary

So It Goes

Well, I'm happy to say that the book is finally out. I'm very pleased with the way it turned out. But I do have one small complaint. It's about the title.

The title is "The End of the Age." I think it's a bit too long. I think it should be something simpler. Perhaps something like "The End."

I think the title is important. It's the first thing people see. It's the first thing they think about. It's the first thing they read.

I think it should be simple. "The End." That's all people need to know.

Sincerely yours,

Tom Greggs

The Life and Times of an Employee at Old Colony Gas

by Richard Lueder

Many, indeed, most students at Bridgewater are dependent on some form of financial aid. Close to the end of last year, when financial aid was at its peak, my gas bill for December was $1800, which is typical of what we pay. I have heard stories of students who spend an entire month for a single month, and I have read of students who are forced to live on nothing but their Social Security checks. The Reagan administration has decided that Social Security recipients and Veterans will be cut in terms of the amount they can receive, and they can borrow or possibly receive by the end of the year. The changes, and many others, are being made nationwide, and although it probably will not hurt Bridgewater students as much, is due to the serious economic conditions of our student body, and in a total amount, $301,500. This proviso means that the Reagan administration has cut the days of our professors when some form of financial aid is still available.

In my own case, I work in the Student Financial Aid Office, and although the changes are being made nationwide, they are particularly hard for us to handle. The week is full of work, and in the wee hours of the morning, I find myself much more tired than I ever was before, and I can see the end of the workday is far from over.

Security recipients and Veterans will be cut in terms of the amount they can receive, and they can borrow or possibly receive by the end of the year. The changes, and many others, are being made nationwide, and although it probably will not hurt Bridgewater students as much, is due to the serious economic conditions of our student body, and in a total amount, $301,500.

On October 1, 1981, the Financial Aid Office must include Social Security benefits and Veterans' benefits in the overall aid situation. This will mean that the aid the student receives will be a combination of Social Security and Veterans' benefits. Although federal dollars will still cover some of the student's expenses, there will be a cut in the amount of aid students will receive, and this will affect all students, and not just the students who receive Social Security or Veterans' benefits. This proviso means that the Reagan administration has cut the days of our professors when some form of financial aid is still available.

The Life and Times of an Employee at Old Colony Gas

by Richard Lourie

Many, indeed, most students at Brandeis are familiar with one or more of the Old Colony Gas rates, as they come by car, on buses, and in vans. Some students even work there as employees, earning money for their lives. But aside from these students, there are few people who really know the company, and fewer yet who know the history of the company.

Old Colony Gas is a company that has been around for a long time. It was founded in 1858, and has been in business ever since. The company is headquartered in Boston, and has been a major force in the gas industry for many years.

The company is run by a group of people called the "Old Colony Gas Board," who are responsible for making all of the decisions about the company. They are made up of people who have been working at the company for a long time, and they are very knowledgeable about the industry.

Old Colony Gas is proud of its history, and is always looking for ways to honor it. The company has a number of historical artifacts on display in its main office, including an old gas meter from the early days of the company, and a photo of the company's founder, Eben L. Jordan.

The company is also proud of its employees, who are dedicated to providing excellent service to their customers. Old Colony Gas is a company that believes in treating its employees well, and it has a number of programs in place to help employees stay healthy and happy.

One of the most popular programs is the "Employee Wellness Program," which helps employees maintain a healthy lifestyle. The program includes a variety of activities, such as yoga classes, cooking classes, and fitness classes.

Old Colony Gas is a company that is always looking for ways to improve. It is always searching for new ways to serve its customers, and it is always looking for ways to reduce its environmental impact. The company is committed to being a good corporate citizen, and it is always looking for ways to make a positive impact on the world.

The company is proud of its employees, its customers, and its community, and it is always looking for ways to give back. Old Colony Gas is a company that believes in doing the right thing, and it is always looking for ways to make the world a better place.

Pocket Mime Theatre

by Richard Pickering

Tone is the number one Holy City liquor store recently purchased by some local investors. litres. This new lease of life could even be attributed to the growing popularity of digital signage. Today, people collect sign, as it is a popular pastime for the reason that the more you know about the world around you, the more likely you are to find something interesting.

Torn Tickets... At the Second Run Theatre

II Does Not Mean Second Best

by Richard Pickering

Preliminary research suggests that the market for second-hand tickets is growing rapidly. This is likely due to the increasing popularity of digital signage and social media platforms. However, despite the benefits of second-hand tickets, there are also some potential drawbacks. For example, some people may be concerned about the safety and authenticity of second-hand tickets.

Sculpture

The sculpture and drawings of Christopher Hearn constituted the first public showing of the artist’s work in wood. The ragtag and symbolic forms of these sculptures dramatically, and with great interest, suggests a different time and place. The works, Hearn describes the process "as an experiment in natural and time-driven sculpture," an experiment in which the artist aims to create a unified image of a nature scene. The artist focuses on such aspects as the visual and spatial relationships between the elements in the scene, as well as the interplay of light and shadow. The surfaces are worked with subtle but limited color, often using a combination of earthy and metallic tones. The artist’s attention to surface is evident in the richly textured and layered wood surfaces that are worked with great care and precision. The resulting exhibit is a showcase of the artist’s mastery of the medium and his ability to create powerful and evocative images.

October in the Galleries

October 3: 10 to 10 a.m.

The catalogue of Susan K. Goodell will be displayed in the Stevens Gallery on October 3. The catalogue will contain a collection of work by Susan K. Goodell, a contemporary artist known for her bold and expressive paintings. The catalogue will also feature an essay by art critic, writer, and curator, Susan K. Goodell, discussing the artist’s work and her influence on contemporary art.

Sports

Children’s Physical Development Clinic

The Children’s Physical Development Clinic of Bridgewater State College opened in September to provide therapy to young children with developmental delays.

Pocket Mime Theatre

by Michael Richard

On Wednesday, September 21, BSC was visited by local mime artist and actor Francis Ford Coppola. Coppola, who is also known for his role as a director and producer, led a workshop for mime students at BSC. The workshop focused on the use of movement and expression in mime performances, and included exercises and techniques for creating visually compelling and emotionally resonant pieces.

October 4: 10 to 10 a.m.

The sculpture and drawings of Christopher Hearn will also be featured in the Stevens Gallery on October 4. The exhibition will include a selection of Hearn’s works created between 1975 and 1980, which explore the relationship between humans and their environment. The works are characterized by their use of natural materials and the emphasis on the interplay of light and shadow. The exhibition will also feature a selection of critical essays written by art historians and critics, providing a deeper understanding of Hearn’s work and its significance within the context of modern art.

On The Roads Again

by Neil Berk

The key to maintaining the importance of stretching outside of your sport is your recovery. Beginning and ending your season the right way can set you up for a productive year. To maximize your potential, use your off-season recovery wisely. A common mistake is to train on the floor directly in front of me. Always plan your recovery schedule in advance of the week. This will leave plenty of flexibility in the floor and your first front. These exercises are completed by most runners before and after your race day. Beginning and ending your season the right way can set you up for a productive year. To maximize your potential, use your off-season recovery wisely.

Highlights While Running:

The week's biggest highlight was the Men's Cross Country Invitational on the 12th. My races were good. I had a personal best race at the invitational. My times were the fastest in the history of the race. I was pleased with how I ran, and I think I could have done even better.

Weekly Training Schedule:

I began my training schedule for the invitational. I ran a few miles on the track to get my legs ready for the race. Then I ran a few miles on the road to get my heart rate up.

Weekly Training Tips:

One of my biggest challenges during the week was to stay focused on my goals. I had a few days off and I was able to focus on my training. I was able to make some improvements in my running.

Check Your Records This Week:

I had a few good runs this week. I ran a 3:10 mile in the track meet. I was pleased with how I ran, and I think I could have done even better.

Best of the Week:

I had a few good runs this week. I ran a 3:10 mile in the track meet. I was pleased with how I ran, and I think I could have done even better.

The Men's Tennis Team opened their season on Saturday at 3 p.m. at the Westford Academy. The team's next match is on Wednesday at 3 p.m. at the Bentley. The team won against the Bentley. The next home match is on Saturday at 3 p.m. at the Bentley. The team won against the Bentley. The next home match is on Saturday at 3 p.m. at the Bentley. The team won against the Bentley.
