THE FACULTY AND OTHER OFFICERS

Arthur C. Boyden, A.M., Principal, History and principles of education.
Harlan P. Shaw, Geography and science.
Charles P. Sinnott, B.S., Geography.
Charles E. Doner, Supervisor of penmanship.
Brenelle Hunt, Psychology and school administration.
Louis C. Stearns, Greenhouse and school gardens; civic biology.
John J. Kelly, Dean of men; practical arts.
Joseph I. Arnold, A.M., History; sociology and economics.
Frank A. Crosier, Instructor in physical education.
George H. Durgin, A.B., Mathematics and science.
Anne M. Wells, Supervisor of kindergarten-primary department.
Alice B. Beal, Supervisor of observation and practice teaching; general method.
Adelaide Moffitt, Reading; Dramatic Club.
Frill G. Beckwith, Handicrafts.
Mary A. Prevost, Supervisor of drawing and handwork.
Frieda Rand, A.B., Supervisor of music; Glee Club.
S. Elizabeth Pope, Dean of women; ethics. (Leave of absence 1926-7).
Frances J. Cattrell, A.B., B.L.I., Dean of women; ethics. (1926-7).
Edith H. Bradford, A.B., Modern languages; French Club.
Priscilla M. Nye, Drawing.
M. Katharine Hill, B.L.I., Literature.
Anna E. Roth, A.M., History and social science.
Florence E. Griswold, A.B., Biology and nature study.
Julia C. Carter, A.B., Children’s literature and library organization; Library Club; Librarian.
Ruth E. Davis, B.S., English expression.
Olave H. Lovett, A.B., English expression.
Lois L. Decker, A.B., Supervisor of physical education.
Ruth A. Henderson, Instructor in physical education.

Training School.

MARTHA M. BURNELL, PRINCIPAL.

Nellie M. Bennett, Grade 6.
Neva I. Lockwood, Grades 5, 6.
Jane Bennett, Grade 5.
Katherine R. Conway, Grade 5.
Louise H. Borchers, Grade 4.
Helene E. Sleeper, Grade 4.

Lucy M. Braley, Grade 3.
Charlotte H. Thompson, Grade 3.
Gladys L. Allen, Grade 2.
Gertrude M. Rogers, Grade 2.
Grace E. Smith, Grade 1.
Flora M. Stuart, Grade 1.

Frances P. Keyes, Kindergarten.

Faculty Council.

S. Elizabeth Pope, Chairman and Treasurer. (Leave of absence 1926-7).
Frances J. Cattrell, Chairman and Treasurer. (1926-7).
Charlotte H. Thompson, Secretary.
Frill G. Beckwith.
Nellie M. Bennett.
Lois L. Decker.
John J. Kelly.
Frances P. Keyes.
Mary A. Prevost.

Charles H. Bixby, Chief Clerk.
Mrs. Harriet F. Bixby, Matron and Steward.
Miss May L. Raymond, Resident Nurse.
Thomas E. Annis, Chief Engineer.
CALENDER, 1927.

Feb. 28, School reopens.
April 15, Good Friday.
April 15-24, Spring vacation.
April 25, School reopens.
May 30, Memorial Day, holiday.
June 2-3, First entrance examination.
June 20, Graduation day.
Sept. 12-13, Second entrance examination.
Sept. 12, Training school opens.
Sept. 14, Normal school opens.
Oct. 12, Columbus Day, holiday.
Nov. 23 (afternoon)-27, Thanksgiving recess.
Nov. 28, School reopens.
Jan. 3, 1928, School reopens.

Sessions are from 9.15 A.M. to 12.30 P.M., and from 1.30 P.M. to 3.30 P.M. There are no sessions on Saturday.

The school may be reached by telephone through the following numbers of the Bridgewater exchange:—

Business Office, 422.
Principal's Office, 162-2.
Steward's Office, 162-3.
Boiler Room, 162-4.
Dean's Office, 155.
Normal Hall (pay station), 8063.
Woodward Hall (pay station), 8118.
Gates House, 204.
Principal's Residence, 359.

STATE NORMAL SCHOOL
BRIDGEWATER, MASSACHUSETTS.

FUNCTION OF THE NORMAL SCHOOL.

This school is one of the ten normal schools maintained by the Commonwealth of Massachusetts for the preparation of teachers for the public schools of the State. The Commonwealth offers freely an educational training that will fit for one of the highest forms of public service.

Modern education is based on two principles: (1) The demand of society is for social efficiency. The school should reproduce life situations; the subject matter should be chosen because of its life values; the methods of study and development should be socialized and at the same time individualized. (2) The nature of children and youth should be the teacher's guide. Work should start with the pupil's native instincts and capacities; subject matter should be of the nature to prompt self-activity, that is, it should be motivated.

The normal school is a professional school. Theory is constantly linked with the actual practice in the training school. The aim of the work is (1) to see that the students know the subjects thoroughly; (2) to teach them how to teach the children the subjects they know well themselves; (3) to prepare them to study the development of the child's mind and adapt the instruction to the stages of growth; (4) to give them such advanced study as will lead to their own development, and prepare them to become useful members of society in the communities where they teach.

The work in observation and in practice teaching is done in the training school: that of apprentice teaching, in schools in near-by towns and cities.
ESSENTIAL QUALIFICATIONS OF PROSPECTIVE TEACHERS.

Young people who desire to enter upon this form of public service should be physically and temperamentally fitted for the work of teaching. "A real love for teaching, based on a genuine love of children, reasonable intellectual ability and good health are minimum essentials in the way of preliminary qualifications. To these should be added adaptability and tact, some degree of executive ability and the saving grace of common sense. Candidates lacking these qualifications can hardly hope to make a success of teaching."

REQUIREMENTS FOR ADMISSION.

I. Application for Admission. — Every candidate for admission to a normal school is required to fill out a blank entitled "Application for Admission to a State Normal School" and send it to the principal of the normal school that he desires to enter. This blank may be secured from the principal of the high school or the normal school. It should be filed as soon after January 1 of the senior year of the applicant as is convenient, and must be filed by June 15 of that year.

II. Blanks to be Filed by the High School Principal. — The principal of the high school last attended is expected to fill out two blanks—one giving the "High School Record" and the other a "Rating of Personal Characteristics"—and send them to the principal of the normal school.

III. General Qualifications. — Every candidate for admission as a regular student must meet the following requirements:—

1. Health. — The candidate must be in good physical condition and free from any disease, infirmity, or other defect that would unfit him for public school teaching. Each applicant must pass a satisfactory physical examination before final admission can be gained.

2. High School Graduation. — The candidate must be a graduate of a standard four-year high school, or have equivalent preparation.

3. Completion of Fifteen Units of High School Work. — The "High School Record" must show the completion of fifteen units accepted by the high school in meeting graduation requirements, a unit being defined as follows:—

"A unit represents a year's study in any subject in a secondary school, so planned as to constitute approximately one-fourth of a full year of work for a pupil of normal ability. To count as a unit, the recitation periods shall aggregate approximately 120 sixty-minute hours. Time occupied by shop or laboratory work counts one-half as much as time in recitation."

4. Personal Characteristics. — The "Rating of Personal Characteristics" and the moral character of the candidate, must, in the judgment of the principal of the normal school, warrant the admission of the candidate.

IV. Scholarship Requirements. — Of the fifteen units presented for admission, at least ten must be selected from the list given below in Section V, and must be of a satisfactory grade as determined by certification or examination. Three of these ten units must be in English and one in American History and Civics.

1. Certification. — Credit by certification may be granted in any subject in which the candidate has secured a mark of A or B, provided that the student is a graduate of a Class A high school or is in the upper half of the graduating class of a Class B high school.

1 The upper half of a graduating class shall, for this purpose, consist of those pupils who have obtained the highest rank as determined by counting for each pupil in the graduating class the number of units in which he has secured the mark of B increased by twice the number of units in which he has secured the mark of A.
2. Examination. — Any candidate not securing credit by certification for ten units must secure credit in the remaining number of units by examination in subjects chosen from the list in Section V.

3. Candidates are not to present themselves for examination in subjects not pursued during the last four years of the secondary school.

V. List of Subjects for Certification or Examination.

Required.

English literature and composition, 3 units.
American history and civics, 1 unit.

Elective.

The six remaining units must be so distributed that the number offered in any field shall not exceed the following, with the proviso that the minimum total amount offered in any chosen field shall be one unit.

Social studies, 3 units.
Science, 3 units.
Foreign languages, 4 units.
Mathematics, 3 units.
Commercial subjects, 2 units.
Fine and practical arts, 2 units.

The five additional units, necessary in order to make up the fifteen units required for admission, may consist of any work which the high school accepts as meeting its graduation requirements.

Social Studies.

Community civics, \( \frac{1}{2} \) or 1 unit.
History to about 1700, 1 unit.
European history since 1700, 1 unit.
Economics, \( \frac{1}{2} \) unit.
Problems of democracy, \( \frac{1}{2} \) or 1 unit.
Ancient history, 1 unit.
English history, 1 unit.
Medieval and modern history, 1 unit.

Science.

General science, \( \frac{1}{2} \) or 1 unit.
Biology, botany or zoology, \( \frac{1}{2} \) or 1 unit.
Chemistry, 1 unit.
Physics, 1 unit.
Physical geography, \( \frac{1}{2} \) or 1 unit.
Physiology and hygiene, \( \frac{1}{2} \) or 1 unit.

Foreign Language.

Latin, 2, 3, or 4 units.
French, 2 or 3 units.
Spanish, 2 units.
German, 2 or 3 units.

Mathematics.

Algebra, 1 unit
Arithmetic, 1 unit.
Geometry, 1 unit.
College Review Mathematics, 1 unit.
Commercial Subjects.

Stenography (including typewriting), 1 or 2 units.
Bookkeeping, 1 unit.
Commercial geography, ½ or 1 unit.
Commercial law, ½ unit.

Fine and Practical Arts.

Home economics, 1 or 2 units.
²Manual training, 1 unit.
³Drawing, ½ or 1 unit.

When the number of qualified applicants on July 1 for any State Normal School, or the Massachusetts School of Art, is in excess of the number that can be admitted, the scholarship record and ratings of the personal characteristics of all applicants for that school will be evaluated in accordance with the method given below. Candidates will then be admitted in the order of their total scores up to the capacity of the school.

The foregoing rules with reference to the distribution and certification of subjects will still be in force. An evaluation of the scholarship (for each year) and personality records of students, as received from the high schools, will be made on the following basis:

(a) Scholarship will be allowed 75 points for 15 units of work.
(b) Personality will be allowed 25 points.

As a basis of computing the total score from the scholarship record, a mark of “A” will be allowed 5 points; “B”, 4 points; “C”, 3 points; “D”, 2 points.

VI. Place, Time, and Division of Examinations. — Entrance examinations may be taken in June and September at any State Normal School (including the Massachusetts School of Art) at the convenience of the applicant. Students who have completed the third year in a secondary school may take examinations in not more than five units other than English, in either June or September. Permanent credit will be given for any units secured by examination or certification.

SCHEDULE OF EXAMINATIONS FOR 1927

JUNE 2 AND SEPTEMBER 12.
8.15-8.30 Registration.
8.30-10.30 English.
10.30-12.30 Latin, commercial subjects.
1.30-4.30 Social studies.

JUNE 3 AND SEPTEMBER 13.
8.15-8.30 Registration.
8.30-10.30 Mathematics.
10.30-12.30 German, French, Spanish.
1.30-3.30 Sciences.
3 30-5.00 Fine and practical arts.

VII. Admission as Advanced Students. — A graduate of a normal school, or of a college, may be admitted as a regular or advanced student, under conditions approved by the Department.

VIII. Admission of Special Students. — When any normal school, after the opening of the school year, can accommodate additional students, the Commissioner may authorize the admission as a special student of any mature person recommended by the principal as possessing special qualifications because of exceptional and vital experience and achievement outside of school. Special students are not candidates for diplomas or degrees until they qualify as regular students, but they may receive certificates from the Department upon the satisfactory completion of the work of any curriculum.

¹ To be accepted for admission to the practical arts course at Fitchburg and the Massachusetts School of Art only.
² A maximum of two units will be accepted for admission to the Massachusetts School of Art.
The courses of instruction and training are grouped in four distinct departments, as follows:

I. *Elementary Department* (Two Years). — For those preparing to teach in elementary schools, including the first six grades only, or in rural schools of all grades.

II. *Kindergarten-primary Department* (Three Years). — For those preparing to teach in the first three grades. This department prepares for teaching little children in the Kindergarten, and in the primary grades with a proper use of kindergarten methods.

III. *Intermediate Department* (Three Years). — For those preparing to teach in junior high schools, including the seventh, eighth, and ninth grades. In this department students elect certain major groups of subjects in which to prepare for departmental teaching. The groups usually elected comprise English and history (including community civics), English and geography, English and modern languages, geography and history, mathematics and science, science and geography.

IV. *Advanced Department* (Four Years). — A course leading to the degree of bachelor of science in education. Graduates of two and three year courses in residence in Massachusetts normal schools may enter a third or fourth year. New students may enter at once on the full four-year course.

### 1. Elementary Department.

[Designed primarily for students preparing to teach in the first six grades. Periods are sixty minutes in length, including time for directed study.]

DETAILS OF THE COURSES OF STUDY.

DEPARTMENTS I AND II.

[*taken only by the kindergarten-primary department.*]

[**omitted by the kindergarten-primary department.**]

Arithmetic.

1. Elementary course. Organization of the knowledge needed by students in preparation for teaching arithmetic. The aim is to make the processes rational, to promote speed and accuracy in their use, and to make the solution of problems thoughtful rather than mechanical. Emphasis on the need of checking work and on methods of doing so.

First year. Twelve weeks, three periods a week. Mr. Durgin.

2. Method. A comparative and detailed study of the methods of (a) teaching numbers to young children; (b) teaching the fundamental operations, common and decimal fractions, percentage and its simple applications and problems.

Second year. Twelve weeks, one period a week. Miss Beal.
Psychology 1. The learning process. An introductory course adapted to students just entering the normal school, aiming to acquaint them with significant facts about the learning process. This is partly to improve the quality of their own learning, but more particularly to lay a foundation for their work as teachers, in which they will direct the learning activities of children.

The child is studied as a reacting organism, involving a brief survey of the central nervous system; the acquisition of definite reactions to situations imposed by the child’s environment; the inherited nature of the child as expressed in reflexes and instincts; study of the latter as the foundation upon which the teacher builds; with special attention to the instincts particularly involved in education. The general laws which govern economical learning are studied and applied to many schoolroom situations.

First year. Twelve weeks, three periods a week. Mr. Hunt.

Psychology 2. Applied Psychology. This course, following the general introduction to the learning process and the student’s term of practice teaching, lays special emphasis on the process by which accurate ideas are acquired and how they become associated so as to result in an organized body of knowledge.

A special study is made of the psychology of the modern teaching techniques employed in Reading, Spelling, Arithmetic, and Penmanship as a basis for the intelligent evaluation of their own procedures.

Second year. Twelve weeks, three periods a week. Mr. Hunt.

Pedagogy. Methods 1. The course includes a study of school conditions and activities in relation to child development and general pedagogy; a comparative and detailed study of methods and materials used in teaching subjects of study in the elementary grades; collateral reading.

Second or third year. Nineteen weeks, two periods a week. Miss Beal.

History and Principles of Education 1. The purpose of this course is to summarize the principles and methods of teaching in elementary schools by tracing their genesis and development; to broaden the horizon of the teacher through an acquaintance with the work of the modern leaders in education; to lay a foundation for future educational reading and discussion.

Second or third year. Six weeks, two periods a week. Principal Boyden.

Professional Ethics. The purpose of this course is to study the relationship which exists, or should exist, between a teacher and all persons with whom he comes in contact in his teaching capacity. It aims to help in the development of personal standards and the creation of such ideals as will be of value in training children toward right living.

First and second years. Twelve weeks, one period a week, each year. Miss Cattrell.

*Kindergarten Theory and Methods. A preliminary course in child study, with emphasis on the early stages of development, including methods and materials adapted to the pre-school and younger kindergarten child.

First year. Twenty-five weeks, three periods a week. Directed observation, twelve weeks, one period a week.

A comprehensive study of the child’s active nature and needs. Includes methods and means for physical development; mental, moral, and social culture; and expression through construction, language, and art. The theory is constantly illustrated and applied in observation and practice teaching.

Second year. Thirty-seven weeks, five periods a week.

Program work; professional reading for a summary of principles and a comparison of methods. A study of educational reports and surveys, with selections from expert kindergarten authorities.

Third year. Twelve weeks, four periods a week. Miss Wells.

Reading 1. Elementary reading. This course includes: (1) the study of the various reading systems used in the State; (2) the study of phonetics and its place in the teaching of reading, in teaching foreigners, and in correcting speech defects;
(3) reading projects, involving the use of pictures, lesson plans for both sight reading and oral reading lessons, and dramatization; (4) story-telling, which includes (a) the study of books on story-telling, (b) the origin of the world’s stories, viz., fables, myths, legends and fairy tales, (c) telling stories and dramatization.

First year. Twenty-five weeks, four periods a week. Miss Moffitt.

**English Expression 1.** The general aim of this course is two-fold: (1) to orient students with regard to standards of English expected in the school; (2) to stress structure and mechanics in so far as they add to effectiveness of thought and expression. To this end, (1) students endeavor to master the sentence as a unit of expression, from the standpoint of grammar and of rhetoric; (2) students have instruction and practice in the application of the main principles of good expression to short pieces of oral and written composition. Attention is also given briefly to word-study, outlining, précis writing, and other details of composition.

First year. Twelve weeks, four periods a week. Miss Lovett and Miss Davis.

**English Expression 2.** This course aims to give the student further practice in expression by means of themes, oral compositions, and special reports, with particular stress upon the social atmosphere. Intensive study is given to certain forms of writing often required of teachers.

Second year. Six weeks, four periods a week. Miss Davis.

**Library 1. Use of the library.** The course aims (1) to give a thorough knowledge of the use of library tools: card catalogue, reader’s guide, indexes to short stories and poems, reference books and the making of bibliographies; (2) to discuss the helps which teachers may receive from the library: lists of books, pictures, pamphlets, magazines. This part of the course includes magazine study and the organizing of pictures and clippings, library lessons for grades I-VI.

First year. Twelve weeks, three periods a week. Miss Carter.

**Library 2. Children’s books.** A course in the study of children’s books; the beginning of literature for children, and its development to the present time; a careful study of Mother Goose, fairy tales, legends, fables and myths. The purpose is to form standards for the choice of reading for children, and to give a knowledge of editions suitable for school and home use. A brief survey is made of books of history, travel, biography, science, art, fiction and poetry suitable for all the grades, in order to form a background of material which will make it possible to encourage and guide a taste for the best in children’s reading.

Second year. Six weeks, two periods a week. Miss Carter.

**Literature 1. Elementary course.** This course has two divisions, unified by the general aim. Approximately half the time is devoted to a study of the materials and methods to be used in acquainting children with their rich poetic heritage. The remainder of the course is given to a study of some specific phase of standard literature, from the broadly cultural point of view. Throughout the course, the aim is secondarily information, but primarily the cultivation of an increasingly conscious literary appreciation, to the end that each student, as a teacher, may have a sound basis for good judgment and good taste in the teaching of literature.

Second year. Twelve weeks, four periods a week. Miss Davis.

*Literature 2. Survey course in American Literature (elective). The main currents of literary thought in America; Colonial and Revolutionary backgrounds; the nineteenth and the early twentieth centuries; contemporary writers. Supplementary reading and research required.

Third year. Twenty-five weeks, two periods a week. Miss Hill.

**Penmanship.** The aim of the course is to develop skill in writing on paper, on the blackboard, and in note-book. The arm or muscular movement is taught, consisting of thorough training in posture, penholding, muscular relaxation for ease and fluency in writing; practice in drills, correct letter formation, words, sentences, paragraphs, for the purpose of correlating good penmanship with all other written work; demonstration lessons before classes in training school; practice teaching; course of study and practice outlined for the different grades in schools. Use is made of standard tests for rating and correcting handwriting, in rate and
quality, and a record is kept of each student's work on individual progress cards.

First year. Thirty-seven weeks, one period a week.
Second year. Twelve weeks, one period a week. Mr. Doner.

**Fine and Practical Arts.**

**Drawing 1. Introductory course.** The course is planned with the aim of giving students a working knowledge of the principles which they will need in directing the work of children, and an acquaintance with the processes which they may use. The subjects are lettering, color theory, design and color application to projects made in Handicrafts 1; representation from the scribble stage through parallel perspective.

First year. Nineteen weeks, five periods a week. Miss Nye.

**Drawing 2. Elementary methods and training course.** A definite, progressive series of lessons is developed in each subject, including demonstrations and lesson plans for each school grade, with discussions on the psychology of drawing. Courses used in neighboring towns and cities are studied.

Second year. Nineteen weeks, two periods a week. Miss Prevost.

**Drawing 3. Practice teaching.** This course includes the teaching of drawing and handwork in the training school. The work consists of two conference periods a week; the preparation of lesson plans and demonstrations in teaching; practical teaching, under direct supervision, in drawing, art crafts, and elementary forms of handwork.

Second year. Six weeks, two periods a week. Miss Prevost.

**Drawing 4. Blackboard sketching.** Lettering for rapid work and for programs, calendar pads and map enlargements. Quick sketches in outline of common objects, illustrations with the flat of the chalk, and color decorations.

Second year. Twelve weeks, one period a week. Miss Nye.

**Handicrafts 1. Introductory course.** This course aims to give the students sufficient technique in the following handicrafts to enable them to carry out the outlines or directions of a supervisor, or to plan work for a small community where there is no supervision. The work includes practice in the following industrial processes: paper folding, paper and cardboard constructions, box making and book-binding. The last seven weeks are given to weaving, basketry, and modeling. Considerable time is spent in working up sand table and theatre projects, using different handicrafts.

First year. Nineteen weeks, five periods a week. Miss Beckwith.

**Music 1. Introductory course.** The aim of this course is to give an understanding of the subject matter necessary for teaching public school music, and a working knowledge of various methods used in the elementary grades. It also aims to train the ear and develop the feeling that a school song, if it is perfectly rendered, with due attention to sentiment, tone, enunciation and rhythm, can be artistic and beautiful.

Lesson plans are made and discussed. Supervised observations are often made in the training school in order that students may, from the outset, be kept in close contact with children. During these exercises students are called upon to participate in the teaching.

First year. Twenty-five weeks, three periods a week. Miss Rand.

**Music 2. Music appreciation.** This course includes the study of the most important musical forms, of the orchestra, and of the great composers. The aim is to suggest possibilities for further study in order to understand the great world of music, and to give a background for successful teaching.

Second year. Twelve weeks, one period a week. Miss Rand.

**Music 3. Practice teaching conference.** During the time when the students are in the training school, opportunity is given to teach music under direct supervision. A general conference is held once a week, for the discussion of problems common to all, for the demonstration of lessons which have been especially successful, and for constructive criticism.

Second year. Six weeks, one period a week. Miss Rand.
**History 1 and 2.** Consideration is given to the aims, materials and methods used in teaching history in the first six grades.

The work includes: the selection of stories illustrating the stages of civilization and those dealing with important persons and events; a rapid survey of the development of civilization in Europe; the organization of American history through the period of discovery, settlement and struggle for independence, the establishment of government under the Constitution. The students become familiar with the use of elementary text-books, maps, pictures and the sand table.

Reading of magazines of current history is required, in the belief that a teacher should be familiar with the problems of the day.

Attention is given to the study of what constitutes good citizenship, and how the ideals and habits of good citizenship may be developed in children.

First and second years. Twelve weeks, four periods a week, each year. Miss Roth.

*History 3. A cultural course adapted to the work of kindergarten and primary teachers.

Third year. Twelve weeks, four periods a week. Miss Roth.

**Physical Education 1 and 2.** The purpose of the department of physical education is twofold:—I. Personal.—(a) To help the individual student to develop to the highest point of physical efficiency by correcting, as far as possible, structural or organic defects and establishing health habits; (b) to develop highest ideals of sportsmanship; (c) to develop leadership. 2. Professional.—To train in methods of applying all of the above to children.

The first purpose stated is worked out by means of (a) a course in personal hygiene; (b) individual corrective work; (c) gymnasium work, including marching tactics, free arm work, apparatus work, folk dancing, group contests and games; (d) The Woman’s Athletic Association, which conducts athletic tournaments (hockey, basket ball, baseball, tennis, bowling), hikes, and winter sports.

The second purpose is worked out through (a) a study of methods of teaching health; (b) selection of schoolroom and playground activities for children of different ages; (c) methods of presenting activities (giving commands, organizing groups, etc.), using the normal class for practice teaching; (d) supervised practice teaching of children in the training school; (e) study of school hygiene and first aid; (f) practice in taking weights, heights, and posture tests.

First year. Thirty-seven weeks, three periods a week. Second year. Twenty-five weeks, three periods a week. Miss Decker and Miss Henderson.

**Science.**

Gardening 1. The aim of the course is to prepare students to plan, plant and cultivate a vegetable garden. It includes a study of seed testing; plant structure and physiology; propagation from seeds, cuttings, bulbs and roots; control of harmful insects and weeds.

First year. Twenty-five weeks (necessarily including one spring and one fall term), two periods a week. Mr. Stearns.

Gardening 2. Supervision of home and school gardens.

Second year. Twenty-five weeks, two periods a week. Mr. Stearns.

Nature Study 1. Ecology. This course aims to deepen the student’s natural interest in living things and to give such knowledge of structure and habits as shall enable her to guide in the nature work of children. During the spring term attention is given chiefly to birds; during the fall term, to insects.

Field trips are taken to study the life in its natural habitat and to develop accuracy of observation.

First year. Twenty-five weeks, two periods a week. Miss Griswold.
Nature Study 2. Correlation. The aim of this course is to gather such facts, suggestions and illustrations as may be helpful in work with children, and to develop methods of collecting and of organizing material for use in teaching.

Second year. Twelve weeks, two periods a week. Miss Griswold.

Geography 2. Elementary course. The course includes (1) observational work to furnish geographical experience as a basis for further study; (2) geographical influences of the form and motions of the earth, climate, ocean, forms of land and water; (3) need and development of industry and commerce; (4) study of continents and countries; (5) map interpretation; (6) preparation of materials and exercises for teaching; (7) practice in conducting class exercises and in making and solving geographical problems; (8) the study of a graded course in geography to determine its adaptation to grade work; (9) geographical literature for grade work; (10) schoolroom appliances for teaching the subject.

Second year. Nineteen weeks, four periods a week. Mr. Sinnott.

Observation and Practice Training.

**Directed Observation in the Training School.** The aim is to give familiarity with schoolroom conditions and methods as a basis for practice teaching, and study of methods of teaching. It extends from the kindergarten through the grades in succession, under specific directions, with oral and written reports and discussion.

First year. Twelve weeks, two periods a week. Miss Beal, Supervisor.

**Practice Teaching. Intensive teaching in the training school.** After careful observation the students serve as assistants in the grades. They study and teach groups of children, organize the material for teaching in five or more subjects, and conduct the class exercises.

Second year. Six weeks, forenoons. Miss Beal, Supervisor.

**Apprentice Teaching.** Extensive teaching, under supervision, in the schools in near-by towns and cities. The purpose is to give breadth of experience in teaching and in discipline. Opportunity is given for substituting. Student-teachers are visited and criticized by the supervisor of training and by teachers from different departments of the normal school. Systematic reports of their work are made to the supervisor by the student-teachers and by the teachers with whom they are working. Sixteen towns and cities are available for this apprentice teaching, with schools ranging from the single-room rural school to the well-graded city school.

Second year. Twelve weeks, all day. Miss Beal, Supervisor.

*Directed observation in the training school.* The aim of this observation is to give familiarity with schoolroom conditions and methods through participation in the work of the room in a variety of ways.

First year. Grades, twelve weeks, one period a week; kindergarten, twelve weeks, one period a week.

Observing and assisting in the kindergarten.

Second year. Twelve weeks, two periods a week. Miss Beal and Miss Wells, Supervisors.

*Practice Teaching. Intensive teaching in the training school.* After careful observation the students serve as assistants in one or two grades. They study and teach groups of children, organize the material for teaching in five or more subjects, and conduct the class exercises. In the kindergarten each student has her own group of children for the term.

Second year. Kindergarten, twelve weeks, forenoons; twelve weeks, one period a week; primary grades, six weeks, forenoons.

Extensive teaching in training school kindergarten, or outside kindergartens, to give experience in all phases of the work.

Third year. Twelve weeks, forenoons. Miss Beal and Miss Wells, Supervisors.

*Apprentice Teaching.* Extensive teaching in primary grades, under supervision, in the schools in near-by towns and cities.

Third year. Twelve weeks, all day. Miss Beal, Supervisor.
III. Intermediate Department.

(This department prepares for departmental teaching in the upper grades and in junior high schools. A large number of elective courses are provided during the second and third years. Periods are sixty minutes in length, including time for supervised study. Parentheses indicate elective subjects.)

III. INTERMEDIATE AND ADVANCED DEPARTMENTS.

Education.

Psychology 1. The learning process. This course is outlined in the elementary department.

Second year. Twelve weeks, three periods a week. Mr. Hunt.

Psychology 3. Professional course for teachers in the intermediate or junior high school. The work of this course is supplementary to that of Psychology 1 and 2. The following subjects are considered: recent educational experiments for improving the efficiency of the public school system; arguments in favor of the 6-3-3 plan of organization; the junior high school organization, including program of studies, school equipment, departmental teaching, differentiation of work, promotion, etc.; psychology of early adolescence as a foundation for methods of instruction and control; some approved schemes for making educational measurements adapted to junior high schools.

Third year. Twelve weeks, three periods a week. Mr. Hunt.

Psychology 4 and 5. Educational measurements and the Psychology of exceptional children. The course includes the following topics:—

Introductory study of the range of ability for any given age or grade. Survey of investigations as to the relative importance of heredity and environment in producing this variation. Psychology of the normal and subnormal studied to ascertain nature and causes of individual differences.

Study of statistical method of handling the data derived from these tests. Interpretation of results. Diagnosis of class and individual needs.

Survey of modern systems of grading and promotion. Problems of retardation and acceleration. Modifying the content and method of education for defectives. Provisions for the exceptionally bright pupil. Study of current problems of 6-3-3 reorganization, with special study of curricula and program-making in junior and senior high schools.

Fourth year. Thirty-seven weeks, three periods a week. Mr. Hunt.

Pedagogy. Methods 2. The course includes a study of school conditions and activities in relation to general pedagogy; a comparative and detailed study of methods and materials used in teaching subjects of study in the upper grades; research work related to educational problems of the day and to pedagogical literature.

Third year. Twenty-five weeks, two periods a week. Miss Beal.

History of Education 1. This course is outlined in the elementary department.

Third year. Twelve weeks, two periods a week. Principal Boyden.

History of Education 2. A study of the sources and evolution of modern educational systems and methods. The social ideals of other civilizations and other centuries, as influencing education. Search is made for the permanent and universal principles of educational procedure, contemporary educational leaders and literature, educational systems in aristocracies and in democracies. A foundation is laid for future educational reading and research.

Fourth year. Thirty-seven weeks, two periods a week. Principal Boyden.

Modern Problems of Education.

First Term.—Problems of classroom teaching in elementary and secondary schools; significant differences in relation to differences in methods of teaching; some results of scientific investigation of teaching problems to inditcat classroom procedure based upon these investigations; influences upon method of teaching exerted recently by contemporaries such as Dewey, Thorndike, Kilpatrick, Judd.

Second Term.—Intensive study of current problems and practice in instruction in one or more special subjects in one or more grades of elementary, junior or senior high schools; contributions made by experimental and demonstration schools, and by statistical and experimental investigation. Recent bibliographies on general and special methods, and practice in making such bibliographies.
Third Term.—The curriculum. Objectives of education as dictated by personal and social needs; types of pupil activity and experience most effective in achieving the several objectives; principles underlying curriculum making. Analysis of three or more courses of study to distinguish characteristics of "subject-syllabus," "project-problem," and "border" types, and serve as a basis for classification. Research work to determine practical problems in formulating a course of study in a special subject or for a grade or group of grades. Determination of effective ways of using a "subject-syllabus" type in relation to the project-problem method of learning and teaching. Textbook: Bonser, "The Elementary School Curriculum."

Fourth year. Thirty-seven weeks, two periods a week. Miss Beal.

Professional Ethics. This course is outlined in the elementary department.
First and second years. Twelve weeks, one period a week each year. Miss Cattrell.

English.

Reading 2. This course includes the application of phonics to work in the upper grades, or to those who have defects in speech; methods of teaching reading in the upper grades, including supplementary reading, platform reading, and oral themes.
First year. Twelve weeks, four periods a week. Miss Moffitt.

Reading 3. Dramatization (elective). The course includes harmonic gymnastics; principles of voice; pantomime; impersonations; public speaking; reading, and staging of plays.
Third year. Twelve weeks, four periods a week. Miss Moffitt.

English Expression 1. This course is outlined in the elementary department.
First year. Thirteen weeks, four periods a week. Miss Lovett and Miss Davis.

English Expression 3. This course examines and evaluates current methods of teaching spelling and English expression in the elementary grades. Various curricula are noticed, both as to form and as to content. A variety of textbooks and teachers' manuals serve as laboratory material.
Second year. Twelve weeks, two periods a week. Miss Lovett.

English Expression 4. Methods in teaching in the junior high school. This course includes (1) a brief survey of the aims, subject matter and methods of teaching English expression in the elementary grades, and intensive preparation for departmental teaching of English expression in the junior high school; (2) a review of those principles of grammar and rhetoric which aid in the technique of artistic writing and speaking; (3) research work in various phases of English teaching; (4) practice in oral and written composition.
Third year. Thirty-one weeks, three periods a week. Miss Lovett.

English Expression 5. Methods of teaching in the senior high school (elective). This course includes (1) purposes and ideals; the examination, selection, and organization of material; articulation of English with other subjects; minimum English standards; problems in teaching the classics; practice in the organization and presentation of material; various phases of testing and grading; individual research.
Fourth year. Thirty-seven weeks, three periods a week. Miss Lovett.

Library Instruction 1. This course is outlined in the elementary department.
First year. Twelve weeks, three periods a week. Miss Carter.

Library Instruction 3 (elective). This course gives practice in the routine work involved in the administration of a school library. Training is given in the mechanics of preparation of books for circulation; in reference work; in the making of bulletin boards, exhibits of books and lists of reading; in accessioning, classification, and cataloguing of books. Illustrative material for school use (including pictures, clippings, pamphlets) is organized. Students act as assistants during library hours.
Second year. Twelve weeks, two periods a week. Miss Carter.
Library Instruction 4. (elective). A continuation of Library Instruction 3. Practice work in the library required. Methods of teaching library lessons, a presentation of a lesson being given by each member of the class.

Second year. Twenty-five weeks, two periods a week. Miss Carter.

Library Instruction 5 (elective). The story-hour and the use of the library by grade children. Experience in planning and conducting library hours with the grades is gained by practice with classes from the training school.

Third year. Twelve weeks, two periods a week. Miss Carter.

Library Instruction 6 (elective). Advanced library work for those who have had the courses outlined above.

Fourth year. Thirty-seven weeks, two periods a week. Miss Carter.

Literature 3. Junior high school literature. The aim of the course is to give students a working knowledge and appreciation of the literature appropriate to the junior high school, and to acquaint them with methods of teaching literature to children in these grades. The course includes narrative and lyric poetry, short poems and longer masterpieces; prose fiction, short stories and novels; biography; the drama. Methods of presenting literature are discussed in connection with subject matter.

Second year. Twenty-five weeks, three periods a week. Miss Hill.

Literature 4. Modern literature (elective.) The course includes the study of literature onward from the year 1830—representative prose, poetry and drama. It aims to give the students an understanding of modern times, and an appreciation of their intellectual, artistic and spiritual ideals as reflected in literature. Extended supplementary reading is required.

Third year. Thirty-one weeks, three periods a week. Miss Hill.

Literature 5. Selected prose and poetry (elective.) This is a course in literary criticism; principles of criticism; analytic study of the work and methods of the leading critics and reviewers; applied criticism; study of contemporary fiction, essay, biography, poetry and drama; comparative literature. It aims to develop a discriminating taste and a keen, sane appreciation of relative values in literature.

Fourth year. Thirty-seven weeks, three periods a week. Miss Hill.

Literature 6. Principal Plays of Shakespeare (elective.). A course alternating with Literature 5. A study of twelve plays, with stress upon interpretation rather than upon etymology, metrical analyses, and antiquarianism.

Fourth year. Thirty-seven weeks, three periods a week. Miss Hill.

Public Speaking 1. This course aims to eradicate faults in the use of voice; to establish correct pronunciation; to reveal the relation of voice to social adaptability; to organize vocabulary study; and to give opportunity for practice in conversation and in extemporaneous speaking.

Third year. Twelve weeks, two periods a week. Miss Hill.

Penmanship. This course prepares students to teach penmanship in the upper grades or in the junior high school, with special reference to methods of correlating the work in writing with the daily written work. Requirements are:—satisfactory paper practice, board writing, and note-book writing. Students who have a special aptitude for penmanship and who desire to specialize in the subject will find the course well suited to their needs. Improvement in rate and quality is recorded on individual progress cards.

First year. Thirty-seven weeks, one period a week. Second year. Twelve weeks, one recitation period a week.

Preparation for the departmental teaching of penmanship in the upper grades.

Third year. Twelve weeks, one period a week (elective.) Mr. Doner.

Fine and Practical Arts.

Drawing 1. Introductory course. This course is outlined in the elementary department.

First year. Nineteen weeks, five periods a week. Miss Nye.

Drawing 4. Blackboard sketching. As outlined in the elementary department.

Second year. Twelve weeks, one period a week. Miss Nye.
Drawing 5. Junior high school methods. Methods of teaching drawing, with especial emphasis upon the work in the upper grades. A definite, progressive series of lessons is developed, including demonstrations and lesson plans, with discussions on the psychology of drawing.

The subjects are grouped as follows: nature drawing, representation, including illustrative sketching and picture design; picture study; mechanical drawing, with application to the making of maps, diagrams and working drawings.

Second year. Twenty-five weeks, two periods a week. Miss Prevost.

Drawing 6. Art appreciation. A study is made of fine art in relation to the home and to the community. A background of culture for appreciation is given by studying historic forms of architecture and historic forms of furniture and decoration with their modern applications; by studying house planning and building in relation to the environment. The material for class work is furnished by the students as the result of reading and research and the perusal of current magazines. Pictures, photographs, tracings and drawings are collected.

Third year. Twelve weeks, two periods a week. Miss Prevost.

Drawing 7. Junior high school training course. The work includes two conference periods a week; preparation of lesson plans; demonstrations in teaching; and teaching, under direct supervision, in drawing, art crafts and elementary forms of handwork.

Third year. Six weeks, two periods a week. Miss Prevost.

Drawing 8. Design (elective.) Theory and principles of design. The application of original designs to textiles, boxes, etc., with block prints, textile dyes, etc.

Third year. Nineteen weeks, two periods a week. Miss Nye.

Drawing 9. History of art and art appreciation (elective). A general survey of the history of architecture, sculpture and painting from the Egyptian period to the Renaissance of modern times. The fundamental principles underlying great works of art are studied in order to increase the students' power to select and enjoy good examples of fine art. Required readings, note-books and discussions.

Fourth year. Thirty-seven weeks, two periods a week. Miss Prevost.

Handicrafts 1. Introductory course. This course is outlined in the elementary department. For men—box making, elementary and advanced book-binding.

First year. Nineteen weeks, five periods a week. Miss Beckwith.

Handicrafts 2. Advanced (elective). Advanced handwork for students showing marked ability in Design and Handwork.

Fourth year. Twelve weeks, two periods a week. Miss Beckwith.

Music 1. Introductory course. Outlined in the elementary department.

First year. Twelve weeks, four periods a week. Miss Rand.

Second year. Twelve weeks, one period a week. Miss Rand.

Third year. Six weeks, one period a week. Miss Rand.

Music 4. History of Music and music appreciation (elective). The aim of the course is to give power in understanding in order to enjoy the greatest music.

The content of the course is as follows: music history, periods from primitive to modern; the lives and works of the great composers; analysis of the structure of music, as found in the various periods covering the important forms, both vocal and instrumental; technical terms in common use; suggestions as to ways in which music appreciation may be taught in the schools.

Third or fourth year. Thirty-seven weeks, two periods a week. Miss Rand.

Practical Arts 1. Mechanical drawing (elective) (men).

Principles of mechanical drawing. Designing, and making working drawings of furniture, toys and other useful projects carried on in connection with shop work. Simple machine design, tracing, blue printing, specifications.

First year. Thirty-seven weeks, four periods a week. Mr. Kelly.
Practical Arts 2.  Shop work (elective).
Shop work in a variety of industries. The purpose of the course is to give a practical knowledge of a number of lines of useful handwork for teachers. Articles are made that are required for school use. Repair work that can easily be done by teachers is emphasized.

Second or third year. Twenty-five weeks, two periods a week. Mr. Kelly.

Principles of printing. Orderly procedure in practical shop work in printing by student, affording excellent opportunity for correlation with English department and other departments of school. Each student will be required to direct a project selected by a group before completing course.

Second year. Nineteen weeks, four periods a week. Mr. Kelly.

Mathematics.

Junior High School Mathematics. This course includes the mathematics for the junior high school grades recommended by the National Committee on Mathematical Requirements. Some emphasis is placed on the methods of teaching the subject matter.

First year. Twenty-five weeks, three periods a week. Mr. Durgin.

Algebra (elective). Review of high school algebra, with some emphasis on methods of teaching. Such advanced topics as time will permit.

Second year. Twelve weeks, three periods a week. Mr. Durgin.

Plane Geometry (elective). Review of plane geometry, with special emphasis on original problems, numerical computations, and methods of teaching geometry in the junior and senior high schools.

Second year. Twelve weeks, three periods a week. Mr. Durgin.

Solid Geometry and Trigonometry (elective).
Third year. Thirty-one weeks, three periods a week. Mr. Durgin.

Analytical Geometry (elective). Designed to enlarge, enrich and coordinate the ideas of algebra and geometry, and to promote the more effective teaching of both subjects.

Third or fourth year. Twelve weeks, three periods a week. Mr. Durgin.

The Teaching of Mathematics (elective). This course includes discussion of the aims, organization, and methods of teaching mathematics in the junior and senior high schools. It includes, also, consideration of (1) the evolution of our present courses in mathematics; (2) reports of the National Committee on Mathematical Requirements; (3) classroom practice, typical lessons, special devices and equipment; (4) examination of recent text-books, especially those for the junior high school, and study of literature on the teaching of mathematics.

Third or fourth year. Thirty-seven weeks, two periods a week. Mr. Durgin.

Modern Languages.

The following courses are open to those who have had good high school courses of three years, or their equivalent, in the subject.

French 1.  Introductory (elective). This course aims to establish a thorough working knowledge of the language. It includes a systematic study and presentation of the principles of grammar, with exercises in translation and composition; augmentation of vocabulary; an elementary course in phonetics and use of phonetic symbols; and conversation based on material in text-books and in French newspapers and on every-day experiences. Preliminary discussion of methods of adaptation to junior high school needs is introduced, with lesson planning and teaching lessons. French is the language of the classroom.

First year. Thirty-seven weeks, four periods a week. Miss Bradford.

French 2.  Methods (elective). This course deals with the methodology of modern language teaching. Special emphasis is placed on the modified direct method for use in the junior high school; study of syllabi; examination of text-books; methods of teaching pronunciation; songs, games, and use of realia. The theories are put into practice in teaching lessons. Oral work is stressed throughout.
One term is reserved for conversation in French on classified subjects relating to every-day life in France.

Second year. Twenty-five weeks, three periods a week. Miss Bradford.

French 3. Advanced French for cultural purposes (elective). The aim of this course is to gain, by means of a correlated survey of the literature and history, and study of the geography of France, a general cultural background, with a view to application of the fundamentals thereof in the work with junior high school pupils. To this end more careful study is made of the authors whose works are appropriate to the junior high school. This is supplemented by a short course in letter-writing and study of noted French letter writers. French is the language of the classroom.

Third year. Thirty-one weeks, three periods a week. Miss Bradford.

French 4. Selected French prose and poetry (elective). Intensive study of the works of representative authors of all the periods, with the chief aims of appreciation of the literature and the establishing of a first-hand knowledge of the life and ideas of another people, with a view to use in the senior high school; extensive outside reading and the writing in French of a paper on the development of a phase of French literature. French is the language of the classroom.

Fourth year. Thirty-seven weeks, four periods a week. Miss Bradford.

Physical Education.

Physical Education 1 and 2. Gymnasium work for all students. Outlined in the elementary department.

First year. Thirty-seven weeks, three periods a week. Second year. Twenty-five weeks, three periods a week. Miss Decker and Miss Henderson.

Physical Education 3 and 4. (a) Special development of field meets, pageants, athletic tournaments; (b) experience in coaching and refereeing in athletics; (c) methods of teaching hygiene; (d) community hygiene.

Third and fourth years. Thirty-seven weeks, three periods a week each year. Miss Decker and Miss Henderson.

Physical Education 5 (for men). The purpose is twofold:

1. Personal—(a) to develop body control in gymnastics, games and sports; to establish health habits; (b) to develop ideals of sportsmanship and team work; (c) to develop initiative and leadership.

2. Professional—to train in methods of applying all of the above to children. Methods of organization and promotion of sports as conducted by Athletic Organizations. Practice in officiating and coaching.

The first purpose stated is worked out by means of (a) a course in hygiene and first aid; (b) gymnasium work, including marching tactics, free arm exercises, apparatus exercises, gymnastic dancing, group contests and games; (c) The Men's Athletic Association, which conducts athletic contests (soccer, basket ball, volleyball, baseball, track and tennis) and supervises the school teams in various sports.

The second purpose is worked out through (a) a study of methods of teaching health; (b) selection of schoolroom and playground activities for boys of different ages; (c) methods of presenting activities (giving commands, organizing groups, coaching, etc.), using the normal class for practice teaching; supplemented by practice teaching in nearby schools.

First and second years—reviews the work as given in up-to-date school systems and affords an opportunity for personal development in muscular development and control which will make the men better fitted to present the subject of physical education to the boys and girls in the schools.

Third and fourth years—a study of methods of organization and promotion, coaching and officiating. Emphasis is placed upon practice teaching, initiative and leadership.

First, second, and fourth years. Thirty-seven weeks, two periods a week, each year. Third year, twenty-five weeks, two periods a week. Mr. Crosier.
Science

Science 1. Applied science. A study is made of the following subjects: processes needed for the interpretation of nature and of human industries; chemistry of air, with special attention to respiration, combustion, tarnishing and rusting, fermentation and decay; nitrogen, fertilizers and explosives; carbon dioxide in relation to plants and animals; the need of ventilation; flame and fuel,—how to start, control and extinguish fires; uses of a chimney; characteristics of a good fuel; water,—simple tests for the purity of drinking water; location, protection and ventilation of wells; acids and alkalies,—relation to each other; common metals. Considerable attention is also given to laboratory procedure, to furnish the basis for the later courses in chemistry.

First year. Twenty-five weeks, four periods a week, including work in the laboratories. Mr. Shaw.

Science 2. Economic chemistry (elective). The purpose of the course is to prepare to teach general science and high school chemistry. The first part includes so much of chemical analysis as is essential to an intelligent study of industrial and economic chemistry. The student learns how to organize chemical facts for a definite purpose, gains insight into chemical processes and procedures, and acquires a useful mastery of laboratory technique. The second part affords opportunity to elect work in water analysis, milk analysis, soil and fertilizer analysis, food inspection, and mineral analysis.

Third year. Thirty-seven weeks, four periods a week. Mr. Shaw.

Science 3. Applied physics (elective) (men). The aim of this course is to develop power to interpret common physical phenomena in the light of the principles that underlie them; to prepare the student to use the laws of physics as involved in other subjects; and to give him experience in the use of apparatus.

First year. Twelve weeks, four periods a week. Mr. Durgin.

Third year. Thirty-one weeks, five periods a week. Mr. Durgin.

Science 5. Methods in science teaching (elective). Familiarity with current methods and courses by visits to several typical junior high and senior high schools, and by critical study of recent text-books and published courses.

Working out of typical projects and lesson plans.

History of high school science teaching.

Fourth year. Twenty-five weeks, two periods a week. Mr. Shaw.

Nature Study and Gardening. These courses are outlined in the elementary department.

First year. Twenty-five weeks (necessarily including one spring and one fall term), three periods a week. Miss Griswold and Mr. Stearns.

Gardening 3.

School Gardening.—Each student applies this study by cultivating a vegetable garden. Seeds are tested, plans are arranged for each garden, soil is prepared for seeds and the plot is cultivated for its special purpose. A number of students also work in co-operation on plots designed for decorative or other special purposes, and direct groups of children in planting these gardens.

First year. Twelve weeks in greenhouse and garden, one period a week. Mr. Stearns.

Gardening 4. Gardening, care of orchard, supervision (elective). This course is planned for students who are preparing to help in increasing the number and the value of home and school gardens. It includes propagation of plants from seeds, bulbs, cutting, layering, root-division; cleft grafting, budding, pruning and spraying fruit trees; landscape gardening; construction and use of cold-frames; garden plans; supervision of children's gardening.

Second year. Thirty-seven weeks, two periods a week. Mr. Stearns.

Civic Biology. This course includes matters pertaining to public health, bacteria in relation to disease control, animal pests, forestry and other community problems.

Third year. Twelve weeks, two class periods and two laboratory periods a week. Mr. Stearns.
General Biology. The aim of this course is to equip students with a background of information which shall help them to understand and appreciate life, the interdependence of living things, and the possibilities of bringing about improved conditions.

The course is also planned to furnish considerable material that would be helpful in guiding the Nature Study of children.

The course includes the study of (1) "Life-processes" and the methods by which these are carried on in plants and in animals; (2) Typical diseases caused by malnutrition, by bacteria, and by lack of certain glandular secretions; (3) Organic Evolution—the history of the idea and the valuable lessons from it; (4) Heredity and the Mendelian Laws; (5) Cell division and development; (6) Main plant groups and main animal groups, with characteristic of each.

First year. Thirty-seven weeks, two periods a week. Miss Griswold.

Biology and Nature Study (elective). This course offers opportunity for more detailed study of certain plant and animal groups than is possible in the General Course, and for wider acquaintance with the natural setting of common forms of life by means of Field Trips.

Third or fourth year. Twelve weeks, two periods a week. Miss Griswold.

Geography 1. Physiography. The course includes the practical study of common minerals, building stones and typical kinds of soil, with constant applications to the study of geography and to the industries; some effects of heat and chemicals upon minerals, with reference to the industries.

The following physiographic agencies are studied: the mechanical and chemical action of the atmosphere; stream and river action; the seas acting on the lands; ground water in relation to caves, springs, geodes, and mineral veins; glacial action; physiographic structures and regions in North America as a basis for an understanding of the distribution and activities of its inhabitants.

First year. Thirty-seven weeks, three periods a week in the laboratory. Mr. Shaw.

Geography 3. The material of this course is organized to serve as a basis for departmental teaching in the upper grades, and includes (1) the work as outlined in Geography 2; (2) a study of the natural regions of our own country; (3) a comprehensive study of America and Europe; (4) a careful study of a few of the typical industries to determine their importance and the geographical factors that have influenced their development, together with their influence upon other industries.

Second year. Twenty-five weeks, four periods a week. Mr. Sinnott.

Geography 4. (A) Advanced regional geography. (B) Correlation of geography and history. (elective).

(A) Selected regions are studied to determine: (1) basis upon which the selection of the region is made; (2) geography of the region; (3) how the region has affected local activities; (4) contribution of the region to the world; (5) great natural regions of the continents.

(B) A study of the leading nations to determine: (1) important facts of world's industry and commerce; (2) influence of geographic environment upon human activities; (3) operation of geographic factors in history; (4) international relationships.

Third year. Thirty-seven weeks, three periods a week. Mr. Sinnott.

Geography 5. (A) Advanced physical geography. (B) Economic geography. (C) Mathematical geography. (elective).

(A) A study of the facts of physiography, geology and meteorology as factors influencing human development.

(B) A study of the physical basis of commerce and industry; foodstuffs, raw materials, power, manufactures, markets, transportation; distribution of industries; laws of trade; routes of trade; place of the United States in commerce and industry.

(C) A study of astronomical phenomena as factors influencing the distribution and activities of men; effects of earth's form and motions; determination of latitude and longitude; measurement of time; calendars; seasons; distribution of heat; map projection and construction; government surveys.

Fourth year. Thirty-seven weeks, three periods a week. Mr. Sinnott.
Geography 6. The industrial development of the nineteenth century (elective). A course designed to give the student an understanding of the rapid industrial progress of the last century as influenced by such factors as: the invention of machinery; division of labor; growth of education; application of science to industry; improvement in methods of transportation; new areas of production; organization of labor and capital; new economic policies.

Fourth year. Nineteen weeks, three periods a week. Mr. Sinnott.

Social Studies.

History 4. A study of the development of American institutions and ideals in the political, social and economic worlds, through European history to the present time. The aims and methods of teaching history and community civics in junior and senior high school are discussed.

First year. Thirty-seven weeks, four periods a week. Miss Roth or Mr. Arnold.

History 5. World history. A survey of human progress from the earliest time to the present.

Second year. Thirty-seven weeks, three or four periods a week. Miss Roth.

History 6. Modern European history (elective). A study of the political, social and economic movements in Europe from 1815 to the present time.

Third or fourth year. Thirty-seven weeks, three periods a week. Miss Roth.

History 7. Advanced American history (elective). A study of the historical documents and material of American history for a more intelligent interpretation of the economic, political and social development of the United States. The course is designed for those preparing to teach history in the junior and senior high schools.

Third or fourth year. Thirty-seven weeks, two periods a week. Mr. Arnold.

History 8. The civilization of ancient and mediaeval times (elective). A study of the development of the political, social and economic life of ancient and mediaeval times as a basis for an appreciation of the achievements of modern civilization.

Third or fourth year. Thirty-seven weeks, three periods a week. Miss Roth.

Fourth year. Thirty-seven weeks, three periods a week. Miss Roth.

Sociology and Economics.

Sociology 1. Social-economic problems. Some of the problems studied in this course are: the population of the United States; immigration; the standard of living; labor organizations; child labor; women in industry; unemployment; poverty; the liquor problem; criminology; penology; the feebleminded and the insane; the conservation of human life.

Fourth year. Twelve weeks, two periods a week. Mr. Arnold.

Sociology 2. Principles of sociology. This is a course in the fundamentals of sociology, and will include a study of: the methods of sociology and its place among the sciences; the historical evolution of society; the elements and structure of society; social organization and progress; the history of social theory.

Fourth year. Twelve weeks, two periods a week. Mr. Arnold.

Economics 1. Principles of economics. Industrial expansion in the United States; consumption of wealth; production; distribution; monopolies; the tariff; monetary system of the United States; credit and banking; taxation; economic progress; and plans of economic reform.

Fourth year. Twelve weeks, two periods a week. Mr. Arnold.

Observation and Practice Teaching.

Directed Observation in the Training School. The aim is to give familiarity with schoolroom conditions and methods as a basis for practice and detailed study of methods of teaching. It extends from the kindergarten through the grades in succession, under specific directions, with oral and written reports, and discussion.

Second year. Twelve weeks, two periods a week. Miss Beal, Supervisor.
Practice Teaching. Intensive teaching in the training school. After
careful observation the students serve as assistants in one or two grades. They
study and teach groups of children, organize the material for teaching in five or
more subjects, and conduct the class exercises.
Third year. Six weeks, forenoons. Miss Beal, Supervisor.
Apprentice Teaching. Extensive teaching, under supervision, in the schools
in near-by towns and cities. The purpose is to give breadth of experience in
teaching and in discipline. Opportunity is given for substituting. Student
teachers are visited and criticized by the supervisor of training and by teachers
from different departments of the normal school. Systematic reports of their
work are made to the supervisor by the student-teachers and by the teachers
with whom they are working. This experience is gained in upper grades or in
departmental teaching in intermediate or junior high schools.
Second or third year. Twelve weeks, all day. Miss Beal, Supervisor.

CONDITIONS FOR GRADUATION.

Each student, who faithfully and honorably completes the full curriculum of
any department, shall, upon the recommendation of the principal of the school,
and with the approval of the Commissioner of Education, receive a diploma of
graduation signed by the Commissioner of Education and the principal of the
school.

GENERAL INFORMATION.

Location.

Bridgewater is one of the pleasantest and most healthful towns in Massachusetts,
with a population of about eight thousand. It is situated twenty-seven miles
south of Boston on the Plymouth Division of the New York, New Haven & Hart-
ford Railroad. The buildings and grounds of the State Normal School are
attractively located near the center of the town, ten minutes’ walk from the railway
station.

Expenses.

Registration fee. The sum of $10 per year for each student is payable at the
opening of the school in September.
Board. Rates for board and room are fixed by the State Department of Edu-
cation, and are intended to cover the actual cost of service rendered. The rate
for this school year is three hundred dollars, payable as follows:

<table>
<thead>
<tr>
<th>Month</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>at the opening of school in September</td>
<td>$90.</td>
</tr>
<tr>
<td>December 1</td>
<td>70.</td>
</tr>
<tr>
<td>February 1</td>
<td>70.</td>
</tr>
<tr>
<td>April 1</td>
<td>70.</td>
</tr>
</tbody>
</table>

This rate is made on the basis of two students occupying one room and taking
care of their room, except for those occupying Normal Hall, in which there are
forty single rooms for students. An extra proportionate charge is made for board
during the regular vacation periods.

Laundry work to the value of 50 cents a week is allowed on the regular price
list; any excess of this amount is an extra charge.
Payments must be strictly in advance, and should be made without the presentation
of bills. A diploma will not be granted until all school bills are paid.
Checks should be made payable to State Normal School at Bridgewater, and
when sent by mail should be addressed to the school.

Tuition. To residents of Massachusetts tuition is free. Residents of other
States may be admitted upon the payment of tuition at the rate of $100 a year,
one-half of which amount is payable at the beginning of each half-year; provided
that the admission of such students does not exclude or inconvenience residents of
Massachusetts.

Other expenses. Students purchase their own notebooks, writing materials,
drawing kits, and all supplies carried away from the school for their future use.
Memoranda for Gymnasium Outfit.—The required gymnasium uniform for women consists of black bloomers, all-white middy blouse, black Windsor tie, black cotton stockings, high white sneakers (no heels). It is advisable to have three blouses. The required gymnasium suit for men consists of long, dark blue trousers with a white stripe (half inch wide) down the sides, a black belt, white, sleeveless gymnasium shirt, and sneakers. It is advisable to have two gymnasium shirts.

Shower Bath Equipment.—(a) The school has been able to obtain at wholesale price large Turkish towels to serve as bathrobe going to and from shower, as curtain, and as towel. Each girl is asked to purchase one ($1.25) when she arrives. This will serve for two years, and will be laundered each time used, with no additional expense or trouble to the student. Students of the intermediate and advanced departments are asked to buy a second towel at the beginning of their third year. (b) A swimming cap. (c) A pair of cloth moccasins.

Rooms in the Residence Halls.

Rooms in the residence halls are supplied with furniture, including mattresses and pillows. Students are required to bring towels, napkin ring, clothes bag for laundry, bath mat 36” x 24”, couch cover, and bed covering for single beds, which should include at least four single sheets and three pillow cases. All articles sent to the laundry must be distinctly and indelibly marked with the owner’s name; initials are not sufficient.

Students are not allowed to use electric irons or cooking equipment in their rooms.

A reassignment of rooms is made at the end of each school year, preference in choice being given to those who have been longest in the school.

Candidates for admission who have applied for rooms in advance may select their rooms in September. The order of choice is determined by lot.

Pecuniary Aid.

The State makes an annual appropriation of $4,000 for the normal schools to be given to students from Massachusetts who are unable, without assistance, to meet their expenses. This aid, however, is not given to students from the town in which the school is located. Applications are to be made to the principal. Applicants are expected to render reasonable service for the aid provided.

A loan fund, at present amounting to over $2,000, has been contributed by friends and graduates of the school, to be used in assisting worthy students. The conditions for loans from this fund are prescribed by a committee of the faculty.

Government.

Students are expected to do, without compulsion, what is expected of gentlemen and ladies, and to refrain voluntarily from all improprieties of conduct. An association of the students, under the guidance of the dean, organizes the details of the plan of student co-operative government.

Regular and punctual attendance is required of every member of the school. The advantages of the school, which are freely offered by the State, are expensive, and the State has a claim upon the student for their faithful use.

Students must not make arrangements involving absence from any school exercise without previously obtaining permission, and must return punctually after any recess or vacation. Those who are necessarily absent at any time must make up lost work promptly upon their return.

When a student finds it necessary to withdraw from the school he must return any of its books or other property which he may have, and receive regular dismissal; otherwise he must not expect to receive any indorsement from the school.

The Student Government Association.

The object of the Student Government Association is to regulate all matters pertaining to the student life of its members which do not fall under the jurisdiction of the faculty; to further in every way the spirit of unity among the stu-
dents of the school; to increase their sense of responsibility toward each other; and to be a medium by which the social standards of the school can be made and kept high. The work of the association is divided into the following lines of activity:

The Student Council, composed of representatives from each of the classes, handles all matters which are of interest to the student body as a whole.

The Dormitory Council, made up of the officers living in the residence halls, has as its fundamental duty the oversight of student conduct in the dormitories.

The Day Students' Council is composed of students who commute, and is interested primarily in questions which concern the students who do not live in the dormitories.

The Social Activities Committee is also a representative group of students, and it initiates and directs the social affairs of the school. This committee consults with the faculty council.

The Association appoints a Hospitality Committee each year, whose primary duty is to welcome and assist new students upon their arrival at the school.
REGISTER OF STUDENTS

1926–1927

I. Elementary Department.

FIRST-YEAR STUDENTS (CLASS 156, ENTERING 1926).

Allen, Etta Hix, Marion, Point Road.
Barnard, Mary Alice, Bradford, 22 Haseltine Street.
Bent, Florence May, Taunton, 8 Jefferson Avenue.
Birkett, Sarah Alice, Fall River, 55 Eastern Avenue.
Boomer, Pauline Frances, New Bedford, 349 Court Street.
