Gabriel Speaks on U.S.-China Affairs

Alexander Gabriel, present Dean of the United Nations Press School, spoke last Tuesday morning in the S.U. Demonstration Room. Having lectured during the past 35 years on world affairs, Gabriel was even present at the founding of the U.N. At Tuesday's lecture, he chose the President's visit to China as his topic. He stated that the trip will have an important impact on the world's concept of peace.

Throughout his lecture, Gabriel stressed his idea that peace is possible in an era; it is only in the last 1,972 years of man's history that he has considered peace as an objective and most hopes for world peace in man have existed only in the last 500 years. Gabriel further stated that it has only been in the last few years that peace has become a political rather than a moral concept.

Gabriel then spoke of the awareness of the public in general. He pointed out that the American public is not completely informed of the truth by his press. Government officials think that people make policy in compromise and therefore nations attempt to hide the truth from their people. Gabriel suggested that Governments themselves, don't think that all they say is not the truth of the trip's cause from the American people. According to Gabriel, Nixon is using moves towards China because he has realized that this country cannot survive without according recognition to Communist China. In considering the new U.S. approach to Communist China, Gabriel stated that Taiwan is hardly to be considered. The U.S. has completely redefined its policy. We now have a policy that should not, and the new nation must consider Taiwan as a province of China and deal with it.

Gabriel expressed his opinion that China should not be over-rationalized by force or the two would come to a reconciliation. Gabriel pointed out that the U.S. wants to further reduce its involvement in Vietnam. If the U.S. could not win in Vietnam, it would not allow successfully with Japan, and it is now more difficult for the U.S. to support the Chinese people. We have now only been in the last few years that peace has become a political rather than a moral concept.

Gabriel closed the lecture by stating his opinion that the Chinese people are seriously seeking world peace. It is not possible to have war in Vietnam and still maintain resources in Vietnam, not while Korea is divided, not with China on its border, and not while South Africa is still enslaved in a form and certainly not while the nation is not ready with the power to destroy this world. "Wonderful as the powers are," Gabriel said, "we are bound to be the only means of maintaining peace in the world. Peace has become a political objective and most important developments in this world." Gabriel further stated that it has only been in the last few years that peace has become a political rather than a moral concept.

Mr. Nader, sponsored by the Student Union, spoke last Tuesday night, March 8, 1972. Everyone is invited to attend. Your questions are welcome. The following explains somewhat the feelings produced by Mr. Nader:

"Of all forms of life that ever existed on this planet, ninety-nine percent are now extinct. They became extinct because for reasons of their environment could no longer support them. Man is in the same situation. If one were to chart the entire history of the earth, one would find that between many billion years ago. 'Man is a relative new-comer. If we were to measure the entire history of life on a 24-hour scale of time, the human being would last for only one minute. If we were to measure the entire history of the earth, we would find that between many billion years ago. 'Man is a relative new-comer. If we were to measure the entire history of life on a 24-hour scale of time, the human being would last for only one minute. If we were to measure the entire history of life on a 24-hour scale of time, the human being would last for only one minute. If we were to measure the entire history of life on a 24-hour scale of time, the human being would last for only one minute.

Maharishi to Lecture on Transcendental Meditation

Transcendental Meditation is a technique taught by Maharishi Mahesh Yogi which brings to the "practitioner's" life a fourth level of consciousness, (Wakefulness, Waking, Dreaming, and Transcendental Meditation). The students International Meditation Society will present a lecture on this technique next Tuesday, March 19, at 7:30 in the S.U. Demonstration Room. This lecture will be followed by brief question and answer period and an informal reception in the lobby of the Student Union Building. At 8:00 a.m., students may sign up to receive their own copy of "Scientific Foundations of Transcendental Meditation and Its Application to Education, Medicine, and General Well-Being," by Dr. Manfred Maroni, Ph.D., Maharishi University of Management.

SNEA-LARGEST ORGANIZATION AT BSC

The largest organization on the BSC campus is undoubtedly the SNEA, The Student National Education Association. Claiming almost 300 members here on campus, the SNEA asks of its members only that they have an interest in education. A dues-paying organization, the SNEA returns many services for the money it takes in. The portion of the dues allotted to the national organization pays for the members magazine TODAY'S EDUCATION as well as for films and other research materials made available to local SNEA's.

Another part of a member's dues is given to the state SNEA organization which provides each paying member with a copy of MASSACHUSETTS TEACHER as well as supplying each local organization with additional research materials on jobs and trends in education. BSC's SNEA is funded by the remainder of the dues.

This year the SNEA created an executive board of 15 including the 3 main officers; the executive board serves to involve more members actively in the organization as well as to aid the officers in the activities of the SNEA. The executive board, except for the 3 officers, is chosen each semester; it includes a representative from each class. The officers of this year's SNEA are: President, Irene Potts; Vice President, Lynne Duseau; Treasurer, Jean Weber; Recording Secretary, Bob Bergquist; and Corresponding Secretary, Linda Nascimento. Professor Wolpert is the organization's adviser.

Like almost every other BSC club, the SNEA has difficulty obtaining and maintaining an active membership. The club keeps its members informed with frequent newsletters but the typical turn out at a meeting is about 10 members. President Irene Potts suggested that this shortage of active members is probably due to incoherence and a lack of time for the students.

As far as the size and political power of the SNEA is concerned, nationwide, it is the largest dues-paying organization in the country; the SNEA has 100,000 members and is located in every state except Nevada. The SNEA, the parent organization, is itself, the largest professional organization in the world having a membership of 1.4 million. The SNEA was active politically, in presently supporting an early retirement bill which if passed will allow 12,000 teachers to retire early; this board is open to new job opportunities. National and state-wide SNEA organizations are also researching present presidential possibilities for the '72 campaign. BSC's SNEA is not planning to research the candidates or the issues but is ready to use the results of other SNEA groups in order to inform its own members of the educational positions of various politicians.

The SNEA was created nationally in 1968, its activities and powers died for a period of time but, in the last two or three years it has risen to new strength. Basically, the purpose of SNEA at BSC is to provide a chance for student interested in education in meet and talk. SNEA attempts to help its members decide whether they want to enter the field of education or not, if not SNEA even can provide alternative information on what its members can do with their degrees in other fields. SNEA keeps its members informed on what's going on in the field of teaching.

Presently, the SNEA is planning and making preparations for the visit of superintendents which will occur in March. The superintendents will be interviewing prospective teachers at the BSC campus and the visit to the SNEA will have a chance to observe the BSC students and campus during the day. The visit, estimated to cost $5,000, will be sponsored jointly by the SNEA and the college campus. If no charge can be made, however, it is necessary to change students a registration fee in order to cover expenses.

Presently, the SNEA is participating with and for the benefit of itself it will make use of the results of other SNEA groups in order to inform its own members of the educational positions of various politicians.

NOTICE TO CLUBS AND ORGANIZATIONS

Budget applications for SGA-recognized organizations are available in the SGA office. Any club or organization desiring funds for the academic year 1972-1973 must fill out a form and return it to the SGA Finance Committee by March 15, 1972.

THE BUDDY CLUB

by VICKI KAHARL

The BUDDY CLUB of BOSTON STATE COLLEGE was founded in September of last year. Its primary purpose is "to be a coordinate agent for service to the more vulnerable members of society: the very old, the very young, and the very sick." Volunteers are channeled through the BUDDY CLUB to other service organizations. CHILDREN'S PROTECTIVE SERVICE, DIVISION OF CHILD GUARDIANSHIP, SELF HELP, INC., YOUTH LIBRARY BUREAU, JUVENILE PROBATION DEPARTMENT. The BUDDY CLUB here has no volunteers for nursing homes. A program organization for senior citizens has not yet gotten under way.

A big brother or sister has one to one relationship with his buddy. The child's parents have to sign a release allowing their child to participate in the buddy program. With the exception of the Taunton Drop-In Center and Brookfield's Self Help, Inc., volunteers usually work closely with a social worker, psychologist, or psychiatrist. Parent's reactions to the buddy program are usually good. You, as a big brother/sister might tutor a child or take your buddy out once or twice a week for an ice cream cone or to the park or a movie.

Fifty percent or more of the children the buddy club works with are from low income families. Some of these children have never seen a movie or been to a museum. Some of them have never been interviewed and have never had a friend to talk to.

The Taunton Drop-In Center, organized by Joe Monaghan, is open twice a week. There are recreational facilities: pool table, assorted board games, table hockey, books to read, arts and crafts and volunteer tutors and counselors.

A one to one relationship here is practically impossible and as Jenny Ames says, "It's a place for the kids to goof off and do whatever the want instead of on the streets." Kids anywhere from 7-15 years or more are welcomed. The Buddy Club meets every other Tuesday at 7:00 p.m. in the Student Activity Center.

Ancient Civilizations

Commit Ecological Suicide

Science Digest. In several cases of "deprivation dwarfism," where a child has been mistreated by his parents and he was abnormally small for his age, test showed no secretion of growth hormone from the pituitary gland. Deficient growth is only one of the defects caused by an abnormal child-parent relationship. Others include bizarre behavior, retarded speech, shyness and temper tantrums. The editor is digging ancient ruins to discover what happened in the extinct seven-foot pre-Columbian Calusa Indians of Florida. The few facts presently available reveal that the Caluses numbered about 2,000 on or near Florida's Marco Island. They had a plentiful food supply and complicated art forms. The March issue of Science Digest reports that wars with the Spanish, slavery, white man's diseases, and a combination of these factors, may have been responsible for the disappearance of this tribe of Indians from the Everglades.

Two ancient civilizations, Sardinia and Tikai, appear to have been victims of ecological suicide, reports the March Science Digest. Soil scientist Gerald Olson studied their ruins and discovered that poor planting practices, slash-and-burn agriculture, tightly packed houses, previously planted buildings caused flooding, erosion and loss of topsoil and subsoil fertility. Dr. Olson warns that we must learn from the successes and failures of those before us that prosperity are closely linked and management go hand in hand.
Newman Club Liturgy Service & Monthly Meeting
Thurs., March 9 - 7:30 pm
at the Catholic Center
All Are Invited

---

**LETTER TO THE EDITOR**

I'd like to thank the Freshman Class for their overwhelming support in distressing events. I'm very happy to be your Treasurer and an officer of the class. In the next two months I will try my best to get your support. Without the help of the other offices, Carol Thomas, Judi Ericson, Mary McDonald, Carol Coleman, and Cathy Mason, I made a lot of friends during the campaign and I won't let them down. If you ever want to know anything or suggest anything my box number is 329 at Great Hill.

Sincerely, Terry Thomas

---

**LETTER TO THE EDITOR**

I would like to thank everyone who voted for me last week. Your support was most encouraging and I sincerely appreciated it. I have to do a lot of work very soon, and that is a lot of work.

I hope I will be able to look forward to your support.

Sincerely, Terry Thomas

---

**LETTER TO THE EDITOR**

To The Freshman Class.

In recent years members of this class voted for and elected four students: Steve Myers, Terry Thomas, Kim Clark, and Terry Thomas, and a class president: Terry Thomas. Among the remaining major issues of concern that face the campus, the most pressing is the viability of the campus. This is a concern that every student should be aware of.

To the campus, I encourage you to consider the alternatives.

Sincerely, Terry Thomas
ROCK & ROLL WITH THE J. GELIS BAND

Test and photos by Brian McKee

This made the seventeenth time I have seen the J. Gelis Band over the past two years, and I can say they have changed that much. They still open two of their songs with the instrumental "Smoky Joe" and close with John Lee Hooker's "Serves You Right to Suffer," but it's between the sound of that style, which has given them their success. From the moment they get on stage they take hold of the audience and keep moving them for the whole night, without waiting even one second of their set.

Last Sunday at Brockton High they did the same old thing, they just played some good old rock and roll. They went through all their better songs, "First I Look at the Puree," "Workin'," "Lookin' for a Love," "Whammer Jamma," and about seven others. Each and every one of them has a chance to show off their musical abilities, without any one dominating the others. Gelis is a good guitarist, but not the best, although he can sustain a single note longer than anyone I have seen. Their image has also changed. Gelis now has his hair cut in a slab on one side minus his goatee, drummer Stephen Bladet, who used to wear black shades, but now wears complete suspenders and has a mustache. Guitarist John Kein wore an orange pair of knickers with velvet jackets, but he's still the same. Pete Rolild has remained the madman he was constantly running and leaping all over the stage, dressed in black and sunglasses. But the J. Gelis Band should never have to change because anything they have done so far has been right.

Over all it was an all good concert It's just too bad they didn't have a Wrex disc jockey for the MC.

'GOVERNMENTMarch 2, 1972

The proposal was part of a broad assessment by Mr. Pifer of the relationship between society and higher education. In general he said that the pressures on the colleges had become "intolerable," and that alternatives were needed to accomplish one of the jobs that higher education now performs.

Adams Cost Is an Obstacle

He described the enrolling reluctant students—numbering perhaps in the hundreds of thousands—paid the "cost function." It "costs scarce resour­ces," he said, "creates insti­tutions...large institutions...they are "costly experiments," meaning that the process of higher education has become a "cost.

On the other hand, Mr. Pifer acknowledged that there would be problems associated with providing new job opportunities and new low-cost "rational services" programs that would appeal to these students.

Tightening up the provision of "talent pool" for other institutions, principally government and industry, at the time of faculty surplus.

One result of providing options outside college for unwilling students might be to reduce higher education's role in providing "social certification" for middle class status, he said. He cited the need for some new surplus. Mr. Pifer observed that higher education's role in class certification was being criticized by minority groups and the poor. He described the enrolling three years. This is a major class status, Mr. Pifer said, the current hostility to higher education, at least.

TRINITY SQUARE TO STAGE SCHOOL FOR WIVES

According to director Adriana Hall, the show is "double cast" with two first-rate companies alternating performances both at home and away. He stated that the aim of this touring production is to introduce Trinity Square to a potential audience, such as the immediate tri-state area, Rhode Island, Massachusetts, and Connecticut, so that they will be aware of the Company's work when it moves down into Providence's Majestic Theatre next season.

TRINITY SQUARE is the first regional American theatre to present thesee Richard Wilbur translation of SCHOOL FOR WIVES since its award-winning production in New York City during the 1970-71 season.

The comment THE COMMENT

Society expects too much of higher education

-ALAN PIFER

Declaring that society expects too much of higher education, Alan Pifer, president of the Carnegie Corporation of New York, has proposed that communities be relieved of responsibilities for "reluctant students" who enroll because they have nothing better to do.

"Serving such students is clearly at odds with many of higher education's other functions," Mr. Pifer said last week in his foundation's annual report. He called on the nation to create new job opportunities and new low-cost "rational services" programs that would appeal to these students.
THE VIEW FROM HERE

Jackie Sosnow is the latest of a long line of top players at P.G.A. for her breading her eggs. It must be "doing do" in the entertainment world, to have a tournament on one's name. Tom Westendarp was the headliner in this year's event with a $60,000 first prize, his biggest payday ever. It's great to see the big shots in show business as well as the high profile players. At the end of the day, they would put some of their prize money up for sponsoring a record deal, which would then go to the desperately needy. Golf indeed is a sport for all. It's good to see the New York Times and the American News are so supportive of the game. What sport can be the biggest money maker? I think it's golf. Arnold Palmer won the tournament in a game of golf, but it's the professionals like Bill Russell. Many face, most writes, fail to even view golf as a competitive sport. Do not get me wrong. Golf is a great game, relaxing for men with pot-bellied paunches, but how can you compare the P.G.A. with the NHL, NBA, or NHL? That's absurd. My complete opinion is that golf is the sport for all. Whatever the sport involves seems to be losing its appeal in commercial business. After all, it is our national pastime.

WOMEN WIN CHAMPIONSHIP

Kathy Fagan

The Bridgewater State Women's Basketball team won their first game in the NCAA Division III tournament. Seniors, Maureen Begley and Stephanie Calisi, scored 11 points each. They defeated Amherst 87-46 in the first round. The Bears are now preparing for a second-round matchup against Williams College. The game will be held on Saturday, March 12, at 2:00 p.m. in the new Buchtel Fieldhouse.

SPORTS SHORTS

There will be a meeting of all women interested in trying out for the track team, on Monday, March 13, at 4:00 p.m. in Room 1209.
