In Memoriam:

Lynden B. Johnson

Lyndon Baines Johnson was pronounced Dead on Arrival at Brooke Army Medical Hospital in San Antonio, Texas on January 22, 1973 at 2:30 p.m. EST. He was 64 years old, which in most plans would not be old enough to retire. L.B.J. however, did retire after nearly six years as the drawing, spectacled President of the United States.

As President he wanted to form a "Great Society", one of prosperity and improved standards for all his people. This was one of the causes of his downfall, he couldn't settle for a "good society" it had to be a "Great Society". His advisors said it was necessary to drop more bombs and escalate the war and they did... and did... and did until United States was divided to a point which it hadn't seemed since the Civil War. Unlike the President during the Civil War, Johnson was not remembered as a man highly concerned with the rights of his "Fellow Americans". He has been eulogized however by Bayard Russell and A. Phillips Randolph, leaders in the Civil Rights movement, who said, "With the exception of Lincoln, who freed the slaves, no single president contributed as much to the cause of racial equality as did Lyndon Johnson, who also contributed to the war in Vietnam.

Most of us still remember the surprise on March 21, 1968 when L.B.J. said, "I shall not seek and I will not accept the nomination of my party for another term." But that few recall is that prior to this announcement he had revealed that he had been diagnosed and began a disengagement of the war - the end of which he never saw. The man who began his career in a burst of glory ended it in a cloud of silence.

Lyndon Johnson quietly returned to his native Texas and died in the peace of the evening of October 22, 1973 at 8:11 p.m. His body was later buried in the family plot. It was during college that he took up the name Kreskin, which he got from parts of his name and from the names of two traditional magicians he most respected. From Harry Kellar, one of America's first great magicians, he took "K"; and from Houdini, a Frenchman and one of the world's great conjurers, he took "in". Kreskin is now in his stage as well as his legal name. As a popular mentalist, Kreskin has performed across the country in night clubs, colleges and special concerts, in addition to presenting business seminars and once practicing as a professional hypnotist in the psychology community. Over the past several years, he has begun to appear more frequently on national television with personalities such as Mike Douglas, who has said, "Kreskin is unique and utterly baffling". While comedienne Phyllis Diller mused, "He is a male witch and ought to be burnt at the stake!"

"I" believe the story of Kreskin's life is a great one. With his own name and from the names of two traditional magicians he has come of his own after nearly 30 years of developing his mentalist-hypnotist performance and "in-flaming other people's thoughts with his own."

The SU Program Committee will call "The Amazing Kreskin" to perform at 8:00 pm in the Auditorium. Tickets will be available at the Information Desk located on the first floor of the Student Union. Admission is $3.00 for the College Community and $2.00 for the general public.

"A Remarkable Man"

The Bridgewater State College Child Development Center, Inc. was born at approximately 6 a.m., Monday, January 15, 1973. The birth was accompanied by the arrival of several children who are enrolled at the Child Development Center.

The Center was started by the efforts of many over a long period of time. Two weeks prior to opening, the plans were made to paint the room and to lay tile and carpet. The room has a beautiful look about it due to the efforts of Luedi Perry and the Buildings and Ground Crew. Student volunteer help was used to restore and build furnishings that would lend itself to the desired environment.

Several members of the faculty have offered ideas and provided moral support. Bill Miller of the Food Service worked hard to enable us to provide a warm nutritious meal for the children from the first day. The Food Service has also assisted us in providing juice and snacks.

The Center was initiated through the efforts of the Student Government and many college organizations, who provided the necessary funds. Luedi Perry, educational director, and the Center staff are very excited and dedicated to an endeavor. As in all efforts of type, funds are still needed.

Mr. Frank Sherry, President of the Bridgewater Alumni Association announced that a new series of Alumni Grants-in-Aid will be offered for the first time during the second semester. Five of these grants will be awarded. Mr. Sherry and the committee has awarded a married woman who is seeking her undergraduate degree as a fulltime student. Each of these 5 awards will be for $1,250.00.

Any undergraduate interested in receiving one of these grants is urged to write a letter of application to Dr. Ellen M. Sherry, Dean of Students. Deadline for submitting applications is January 31, 1973. The committee will need to decide the recipients on January 2, 1973.

The committee in addition to Dean Sherry, are: Mr. David Morowidt, Financial Aid Officer; Mr. Frank Dunn, President, and Assistant Principal of Central School in East Bridgewater; Mrs. John Jones, Assistant to the Dean of Women, Bridgewater State College; and Mr. Frank Sherry, President of the Bridgewater Alumni Association ex officio.

Date of Birth;

January 15, 1973

New Alumni Scholarships to be Awarded for Second Semester

Mr. Frank Sherry, President of the Bridgewater Alumni Association announces that a new series of Alumni Grants-in-Aid will be offered for the first time during the second semester. Five of these grants will be awarded to a marriaged woman who is seeking her undergraduate degree as a fulltime student. Each of these 5 awards will be for $1,250.00.

Any undergraduate interested in receiving one of these grants is urged to write a letter of application to Dr. Ellen M. Sherry, Dean of Students. Deadline for submitting applications is January 31, 1973. The committee will need to decide the recipients on January 2, 1973.

The committee in addition to Dean Sherry, are: Mr. David Morowidt, Financial Aid Officer; Mr. Frank Dunn, President, and Assistant Principal of Central School in East Bridgewater; Mrs. John Jones, Assistant to the Dean of Women, Bridgewater State College; and Mr. Frank Sherry, President of the Bridgewater Alumni Association ex officio.

TOWNSPEOPLE TO FIGHT RATHSKELLER

An open meeting was held at the American Legion on Monday, January 23rd to discuss the new location of the Rathskeller in Bridgewater State College. Student representatives from the College and the Town of Bridgewater were present.

The meeting was called to order by President John Smith of the College. He welcomed all to the meeting and introduced the topics for discussion. He stated that the Rathskeller, which is the social center for the College, had been located in the basement of the College Union for many years. However, due to the increase in college enrollment, the Rathskeller had become overcrowded and no longer provided the necessary social atmosphere for the students.

The College and the Town of Bridgewater were in disagreement over the new location of the Rathskeller. The College wanted to keep the Rathskeller in the basement of the College Union, while the Town of Bridgewater wanted the Rathskeller to be located in the Colonnade, a public area of the Town.

Several students and members of the College faculty spoke at the meeting, expressing their concerns about the new location of the Rathskeller. They stated that the Rathskeller was an important part of the College's social life and that its new location would greatly affect the students' social experiences.

The meeting ended with the decision to continue negotiations between the College and the Town of Bridgewater to find a mutually acceptable location for the Rathskeller.

The Forensic Society

The forensic society closed the fall semester with an impressive performance in debate and an exciting competition in the closing debate. The team includes members from several departments of K-State who have been selected for their skills in critical thinking and problem-solving.

Dear Seniors of 1971:

I have just graduated, this past week, from Bridgewater State College. My four years at Bridgewater College have seemed to me to be quite a success. To say that they have been uneventful is quite an understatement. My reason for writing this letter is to advise you that I am hoping that this year’s seniors will not be too much like my own. If not, it will be a great disappointment to me. I hope that my four years at Bridgewater will reflect the findings and conclusions of my four years at Rockingham.

The College Forensic Society held its first competition in February of this year, when the junior college was selected as the host. The senior debate team won four out of five matches and placed second in the tournament. I have enjoyed my college years at Bridgewater, and I am glad that I am not so much a part of the college life now as I was four years ago.

The many pictures of the seniors at dedication, at graduation, and at the college yearbook have been left at Bridgewater. It seems to matter that these remarks should receive much more attention than they have in the past. Whether we are senior or graduating, this is one of the few times in life that we can reflect on the fruits of college an activity that is here. It is up to all of us to take advantage of this opportunity to build a better world.

The glass recycling drive is an excellent example of Lord Acton’s philosophy that “the best of men can be found in the fewest numbers.” It is a recognition that the glass industry has obscured the needed resources of energy -- witness the blackouts in the United States. The support given to glass manufacturing companies by the producers of throw-aways clearly is folly to consume this precious energy to crush, melt and remake bottles.

There are these splendid opportunities for building a better atmosphere. It is up to all of us to make better use of these opportunities. The glass recycling drive is an excellent example of Lord Acton’s philosophy that “the best of men can be found in the fewest numbers.” It is a recognition that the glass industry has obscured the needed resources of energy -- witness the blackouts in the United States. New Academic Calendar affects Athletes Adversely

If the prospects of returning yourself to the great BSC treadmill don’t exactly warm your heart, let us suggest a more positive attitude: Jacobian calculus (and most other mathematical subjects) can be made less painful by being more mindful of the problems you face. Steady progress in a subject is the key to success. This approach involves knowing what you are doing, having a clear goal in mind, and having a plan for achieving it. It also involves being willing to work hard and to persevere even when things seem difficult. This approach will help you to achieve your goals and to make progress in your studies. It will also help you to enjoy your studies more. So, if you are finding calculus difficult, try to apply these principles and you will see a difference.

We hope that the new year will help us understand each other, that Grants is interested in people not just dollars.

Wrestling

Babson Boggles Bears

by Bob Wiesner

It was no contest for the Bridgewater hockey team monday night as they were crushed by a first skating high scoring Babson College 16-0.

In the first period Babson scored twice before the Bear’s center ice Jim McKean banged home his first of three which left Bridgewater down by 5-2 lead at the 1/3 marker. As usual penalties hurt Bridgewater, which has been it’s main revenue of problems in most of its games.

The second period saw three more goals, two by Babson and one by Jim McKean. The second period was slow and dull for both clubs. It was in no way a display of the capabilities of either hockey club.

Problem of the game could be attributed to a wet ice surface in a rather warm and unfinished arena. The Bears have been playing in a practice risk up in Newton and it is reported that the main arena will be ready in a few weeks. The new rink will be a rather impressive night still under construction.

The third period was the same on the gravy, as Babson booted the score to 16-0 before the Bears were able to score.

It was during Babson’s second effort, that Steve Foley who scored his second of the night was chased by a fast skating high scoring Babson College 16-0.

Babson closed out the scoring in the first period to skate off with a 5-2 lead at the 1/3 marker. As usual penalties hurt Bridgewater, which has been it’s main revenue of problems in most of its games.

The second period saw three more goals, two by Babson and one by Jim McKean. The second period was slow and dull for both clubs. It was in no way a display of the capabilities of either hockey club.
