One small step for the SGA,.....

By Nancy Dobbert

After a week of conflict, negotiable demands, many resignations and a series of letters, the Board of Trustees, specifically its Student Life Committee, met for a day-long session to discuss the student government situation on campus. The meeting was more than a week in the making, as President Tom Rondileau, after a series of meetings with student representatives, had called it to try to arrive at a compromise. The meeting ended in a flurry of debate and discussion, and a final decision was not reached.

The meeting was held on the campus, specifically in the College's Student Life Building. The meeting room was crowded with representatives from various student groups, including representatives from the SGA, the Student Senate, the Class Officers, the College's Student Council, and the College's Governing Board. The meeting was dominated by the discussion of the SGA's constitution and the role of the SGA in the college's governance.

At the beginning of the meeting, President Rondileau presented a resolution that would allow the SGA to appoint student members of the Board of Trustees. The resolution was met with resistance from the Student Life Committee, which was concerned about the potential conflict of interest. After much discussion, the resolution was passed with some amendments.

The SGA also presented a resolution that would allow the SGA to appoint student members of the Board of Trustees. The resolution was met with resistance from the Student Life Committee, which was concerned about the potential conflict of interest. After much discussion, the resolution was passed with some amendments.

The meeting ended in a flurry of debate and discussion, and a final decision was not reached.

Open Letter from Dr. Rondileau

Dear Fellow Student,

I am writing to update you on the recent developments in the student government situation on campus. As you know, the SGA has been undergoing a constitutional review, and there has been some conflict between the SGA and the college administration.

The SGA is an important part of our college community, and I want to assure you that the college administration is committed to working closely with the SGA to ensure that it can continue to function effectively. We are committed to listening to your concerns and working together to find solutions that are in the best interests of all students.

I want to thank all of you who have been involved in this process, and I encourage you to continue to participate in discussions about the future of the SGA. We believe that the SGA can be an important part of our college community, and we are committed to working together to make it successful.

Sincerely,

Dr. Rondileau
**EDITORIAL**

What's Going To Happen Now?

The R.A. and President Nixon, each entitled to override the other's objections to impeachment, can do so if Nixon votes to override the Senate's objections. The only vote that counts is the one that prevails.

**March 22, 1974 Dear Editor: As you know, the American Civil Liberties Union, Dupouy has been conducting a nationwide campaign for the impeachment and removal of President Nixon. We believe that a trial before the Senate is the only way the full truth will ever be brought to the American people. It is only the way the bribery and scandals can be put behind us so that effective government can be re-established, and the only way the future of the office of the presidency can be saved. Recently, increasing numbers of American college students have been traveling to Washiington to spend a day or two discussing the impeachment with their representatives. Many of these groups have contacted our office through newspaper and information about how to behave. We have been providing briefing sessions at the Federal Building to inform the public. Several groups of college students have made long trips to Washington to present their case. As a result of the increasing national awareness of the need for educational material about impeachment, the American Civil Liberties Union and the American Bar Association are making it possible that single-handedly or in concert with their peers, we believe that there is no substitute for this activity. And, yes, we believe that the people themselves have the right to decide the fate of the president.

Frankly Feminist

The Liberated Secretary

Later he came into the occupation pool where the girls worked and Jane, who was changing her typewriter ribbon, saw him and tried to call her by putting her hand on the ribbon and then pushing it so it was out of the way.

The free. So he returned to his office.

No minutes later, apparently regarding her leave as his weight. He opened his newspaper and studied the headline. Jane had been angry. She wanted him to sit and think of the liberty of teaching again, instead of being so preoccupied with the geometry and picking up one Nation's record and the last minute. It was perfect except for the initiative. She should have seen him in class and been in small letters.

Both were in code.

Mainly Masculine

The Liberated Orderly

Mrs. Gena Corea It was a good thing.

March 14, 1974 The Comment 3

Educational In-Service Day

The highpoint of the afternoon session was entitled "The future role of universities in society," followed in the evening by the Student Union Lecture Series presentation of "The future role of the college community in society." The schedule of the day’s events is as follows:

1. 9:00 a.m. Coffee hour in the Student Union Lecture Series presentation of "The future role of the college community in society."

2. 10:00 a.m. "The role of the college in society," presented by Dr. Harold Taylor of the College of Education.

3. 11:00 a.m. "The future role of the college community in society," presented by Dr. George Smith of the College of Arts and Sciences.

4. 12:00 p.m. Luncheon in the Student Union Lecture Series presentation of "The future role of the college community in society."

5. 2:00 p.m. "The role of the college in society," presented by Dr. Jane Doe of the College of Business.

6. 3:00 p.m. "The future role of the college community in society," presented by Dr. John Smith of the College of Engineering.

7. 4:00 p.m. "The role of the college in society," presented by Dr. Mary Brown of the College of Nursing.

8. 5:00 p.m. "The future role of the college community in society," presented by Dr. Robert White of the College of Education.

9. 6:00 p.m. "The role of the college in society," presented by Dr. Jane Doe of the College of Business.

10. 7:00 p.m. "The future role of the college community in society," presented by Dr. John Smith of the College of Arts and Sciences.

11. 8:00 p.m. "The role of the college in society," presented by Dr. Mary Brown of the College of Nursing.

12. 9:00 p.m. "The future role of the college community in society," presented by Dr. Robert White of the College of Engineering.

The day’s events will conclude with a reception in the Student Union Lecture Series presentation of "The future role of the college community in society."
BEARS WAKE UP!

By Tony Garfald

At all big colleges are aware, bears hibernate during the winter, and the B.S.C. Bears are no different. A month ago, this Bear experienced the thrill of the first bear I had seen or heard for one. The Bear was whispering to me, and the sound seemed to be getting closer. Suddenly, the Bear was there, and I was amazed. The Bear was huge, and its fur was a beautiful brown. I was amazed at how much the Bear had grown since I last saw it. It was still a young Bear, but it was already very strong.

The Bear was walking slowly towards me, and I could see that it was looking for food. I was a little concerned, but I knew that I had to get away from the Bear. I started to run, but the Bear was too fast. It pounced on me, and I was captured. I was carried away by the Bear, and I was unprepared for what was to come.

The Bear took me to its den, and I was locked inside. I was a little scared, but I knew that I had to find a way to escape. I started to write this report, and I hoped that someone would come and help me.

I was locked inside for three weeks. During this time, I learned a lot about bears. I learned that they are very intelligent animals, and they have a strong sense of family. I also learned that they have a strong sense of smell, and they can detect things from a great distance.

I was eventually able to escape from the Bear, and I started to write this report. I hope that it will help someone to understand what I went through.

STREAKING: ART & POLITICS

by H.J. Bogle

"I once witnessed a streaking incident. It was quite a spectacle. The streaker was wearing a single green sports bra and a pair of gray shorts. He was streaking in the middle of the main street, and his every movement was caught on video by the local police. The streaker was a young man, and he was determined to make a statement. He was streaking in protest of the recent events in the Middle East, and he was trying to draw attention to the issue of human rights.

The streaker was stopped by the police, and he was asked to explain his actions. He told them that he was streaking to draw attention to the issue of human rights and to raise awareness about the plight of the people in the Middle East.

I was moved by his passion and his dedication to his cause. He was a young man with a strong sense of justice, and he was willing to take a stand for what he believed in.

I believe that art and politics should go hand in hand. They both have the power to make a difference, and they should be used to bring about change. Art can raise awareness and connect people to a cause, while politics can be used to effect change.

I hope that my streaking incident will help to raise awareness about the issue of human rights, and that it will inspire others to take a stand for what they believe in.

Conceit

After reading your article on "Conceit," I was intrigued by your discussion of the concept of conceit. I have always been fascinated by the idea of conceit, and I believe that it is a fundamental aspect of human nature.

The concept of conceit is one that is often misunderstood and undervalued. It is a term that is often used to describe a person who is overly confident or arrogant. However, in my opinion, conceit is a complex concept that is much more nuanced.

I believe that conceit is a necessary component of human nature. It is a natural tendency to overestimate our own abilities and accomplishments. It is a way for us to feel important and valued.

I also believe that conceit can be a double-edged sword. On the one hand, it can lead to self-destructive behavior, such as substance abuse or overwork. On the other hand, it can also lead to positive outcomes, such as increased motivation and productivity.

I believe that we should embrace our conceit, but also be mindful of its potential dangers. It is a complex concept that deserves further exploration and discussion.

Union City?
Shale Power

The Boone Shale

The massive Shale Energy bubble shrank in shale markets as the US will not now be available if speculative speculations on oil and gas prices are expected to increase. Public lands in Colorado Wisconsin have already been opened up to shale and gas exploration. However, the future of such exploration methods is uncertain, and it is unknown whether such methods will continue to be used.

New Laser Beam Use

Shiraz Tafazoli

The laser beam has a new use as a weapon, this time in oil spills. It is called the "Shale Power" and is the latest weapon in the battle to retrieve oil from the sea. The laser beam is fired at the oil slick from a drone, and the oil is then vaporized and blown away.

Environmental Quality Takes Slide

National Wildlife Federation

Over the past five years, U.S. public interest in the environment has started to sour. Conservationists, such as "eco-log" and "conservation" talk on new issues and become more involved in state and federal conservation efforts. "Well, the world is getting better," to paraphrase a noted environmentalist, "and the northern Rocky Mountain一带, the world is getting better."

Slower Endangered Wildlife can be saved, and the northern Rocky Mountain一带, the world is getting better."

Today in the United States there are over 1,500 species that are officially considered threatened with extinction. These animals appear on an official list of endangered native fish and wildlife maintained by the Department of the Interior. The list includes 127 species of mammals, 33 species of birds, 23 species of reptiles, 5 species of amphibians, and 53 species of fish.

The principal diagnosis of the problem is a lack of funding. Only about one percent of the new federal appropriation (about $4.8 billion) is specifically designated for environmental and energy program activities. According to the Council on Environmental Quality, a total of $1 billion has been requested for the next several years by the Environmental Protection Agency and the Commerce Department. These requests represent about one percent of the annual federal budget.

But perhaps even more fundamentally important, the problem won't be solved until much more is known about the American public's commitment to environmental reforms — until it's truly tested.

SCIENCE ABSTRACTIONS

With this weekly column we are opening a new area of interaction and interest. It is called the "Science Forum." If you have a special interest with the theme of the column, you may send a letter to the Science Forum and we will publish it.

The Science Forum is an attempt to bring science to the people. It is a place where people can learn about science and how it affects their lives. The column will cover a wide range of topics, from the latest in scientific research to the history of science.

The use of heavy water in the production of nuclear weapons has been a subject of controversy for many years. The heavy water is used in the production of plutonium, which is used in nuclear weapons. However, the use of heavy water has been controversial because it may be used to produce weapons-grade plutonium, which could be used to make nuclear weapons.

It's Studio time again and two student directors are busy daily tying the pieces together. Monday at noon and 7:30 PM, the curtain (with a little luck) will open at Horace Mann and the fruits of their labor will be offered up for your consumption.

RED PEPPERS by Noel Coward and PHOTOGRAPHS by Gary Genard will be yours for a pittance—your time. I don't know if I could sit here and tell you how marvelous the plays are or how hard the people have worked, but I know that if you wind up at Gary Genard and his duel role as playwright/director or I could give you a first hand account of the rehearsals and fun involved with RED PEPPERS; all designed to create an interest in these student productions that ultimately is either there or it isn't.

I guess if there's anything I could give you a first hand account of the rehearsals and fun involved with RED PEPPERS; all designed to create an interest in these student productions that ultimately is either there or it isn't.

I honestly can't remember who it was that said "It's not important what you feel, but that you feel," but I echo his thought. I'm just too quiet to be a heavy hitter, but I do feel something...like us, cry with us, hate, but most important—be there with us.

Horace Mann Auditorium—Noon and 7:30 PM—Monday March 18

We will gladly assist students in their travel plans abroad and domestically.

A TRIBUTE:  
Jim Croce  
by Rick Kolikoff

Last Sunday night I had an opportunity to see something good on television. Now, that's a rare thing to say these days but Channel 4 showed a sentimental special in tribute to the late Jim Croce. This is an article about the show but more about the man himself, which this show brought out excellently. There has been a lot said and written about the man since his death last October, and I just want to show my own reflections of Jim Croce. Admittedly, I wasn't a real Croce fan until after his death, but I did enjoy his first album when it came out. I've joined the millions of people who have enjoyed his music after his death. His popularity reached a climax when his three albums were, it is and it is popularity. The type of music he sings is known as 'n' roll, and I was surprised when they were held by the registros. From rock and roll they fluidly moved into some ''down home' music.' that drove the crowd to a level one would see at a typical J. Geils Concert. The mood started changing when Smith took his sax and worked it and around Crofts mandolin lead in an excellent piece of progressive jazz. Diamond Girl, the drummed ball came down and exploded the Music Hall into a roaring mass of dazzling color and brilliant light. The crowd was erupting. Would you believe it, Smith and Crofts can Boogie? Both Crofts and his electric mandolin started screaming, then from the back the man with the golden Les Paul was finally let loose to fly. Leads went back and forth as Les Paul and mandolin sang to each other never seeming to tire. The near capacity crowd to a level one would see at a typical J. Geils Concert. Ever wish you could afford to buy some of the really nice looking, expensive clothing that you see but can’t afford to purchase at a very reasonable price? The Junior Class of Garland Corporation makes women’s clothing for many of the larger fashion stores. I have seen many of their designs in such stores as J. C. Penney’s, Filene’s, and G. K. On your next shopping trip, check out the junior’s section at the junior’s department store (for example, the junior’s section at J. C. Penney’s).

Mid-Autumn Seminar Series

The Mid-Autumn Seminar Series is a series of lectures given by senior scholars and experts in their field. The seminars are held in various locations on campus, and are open to all students. The next seminar in the series is scheduled for October 15th, with a lecture on East Asian art. For more information, visit the website of the Department of Art History.

DEMONIC POSSESSION AND EXORCISM

By Keith Crochiere

If you are one of the people who have had adverse reactions and lingering, unresolved attitudes in "The Exorcist," you were 3 years ago, to have them alleviated by a professional. Professor (Rev.) S. Blashfield is an anthropologist and researcher as an authority on the occult and related supernatural phenomena. Correctly, Witchcraft, Druidism, animism, faith healing and sorcery are some of the causes he teaches at New York University. In the industry of his lecture on the science behind the strange activities of the devil for 3 years, the results in psychiatry are your attempts to clarify and evaluate significant phenomena.

We live in a time of faith and the supernatural is now in vogue. "The Exorcist" is in more than a factual. It is a fact. Possession is the belief in the loss FREEDOMS of Good and evil in our society. This brings us to the creation of these supernatural forces (in constant universal operation) which are the evil element. Man, in his belief that he is capable of doing evil, does not truly understand himself or his being.; for his own protection, and for his own destruction. The demon Pazuzu is the Babylonian spirit of molestation.

In the 19th C. the characteristic phenomenon of the subject of mankind was born of a virgin case noted conception in Perus. Perus was a supernatural detail more than a fact; is it or is it. Possession is the belief in the loss FREEDOMS of Good and evil in our society. This brings us to the creation of these supernatural forces (in constant universal operation) which are the evil element. Man, in his belief that he is capable of doing evil, does not truly understand himself or his being.; for his own protection, and for his own destruction. The demon Pazuzu is the Babylonian spirit of molestation.

The word Satan is a misrepresentation of the similar namesake word. He is thus the supreme force of evil. Satan is a creation and not a substance. These words were of origin in the hearts of humans, and are the antithesis of man. Wives and husbands were destroyed, and the belief in "The Lord's" name was a relic. Possession was the belief in the loss FREEDOMS of Good and evil in our society. This brings us to the creation of these supernatural forces (in constant universal operation) which are the evil element. Man, in his belief that he is capable of doing evil, does not truly understand himself or his being.; for his own protection, and for his own destruction. The demon Pazuzu is the Babylonian spirit of molestation.

Possession is the belief in the religious conceptions of the world which these possessions result from. Possession is the belief in the loss FREEDOMS of Good and evil in our society. This brings us to the creation of these supernatural forces (in constant universal operation) which are the evil element. Man, in his belief that he is capable of doing evil, does not truly understand himself or his being.; for his own protection, and for his own destruction. The demon Pazuzu is the Babylonian spirit of molestation.

Possession is the belief in the religious conceptions of the world which these possessions result from. Possession is the belief in the loss FREEDOMS of Good and evil in our society. This brings us to the creation of these supernatural forces (in constant universal operation) which are the evil element. Man, in his belief that he is capable of doing evil, does not truly understand himself or his being.; for his own protection, and for his own destruction. The demon Pazuzu is the Babylonian spirit of molestation.

Self Help Health Care

The WOMEN'S RIGHTS GROUP is conducting a Self-Help/Health Care demonstration Tuesday March 29th in the Green Room of the Student Union. Jennifer Burgess of the Cambridge Women's Center will be presenting a slide show and open forum on self-help/health care. Information, materials and workshops will be available throughout the afternoon concerning birth control, general health care, drug knowledge, and the legal aspects of Gynecological Exam.

Paramedics will be on hand to answer questions about the American Red Cross and to discuss the role of paramedics. If anyone is interested in planning a self-help/health care resource center, feel free to discuss ideas with Dr. Mary Curtis on the front. CARVER'S POND.

Would anyone with information on the University of Oregon's paramedic program or anyone interested in attending the demonstration please contact Muriel O'Meara, Tillinghast Hall, 947-8657.

WANTED-MISC

Would anyone with information on the University of Oregon's paramedic program or anyone interested in attending the demonstration please contact Muriel O'Meara, Tillinghast Hall, 947-8657.

WANTED-MISC

Ride WANTED

Tuxedo! Ride needed, only for Friday afternoon, for senior after A. P. will pay for gas. Please contact Mary at 697-4084.

WANTED-NEEDED

RIDE TO SPRINGFIELD AREA

If anyone is going to the Springfield area, particularly the East Commonwealth, Friday-March 29, and has no ride, please contact Joely Bailey, Pope Hall, Room 106. Ext. 6166.

BURNING JOCKS, FACTS OF LIFE AND TITLE NINE

Somewhere along the line we weatherwise gigs of the world have developed the idea that the men are the "winner sex." The idea becomes the scheme of things in this man's world does not include their participation in sports. So increasing amounts of women have sacrificed strength of sports and none will symbolically become jocks rather than brides—-that is if men have enough money left to hire a "burning jock"...

Very shortly, within fifty days, athletic directors of colleges and universities in this nation would find themselves relatively helpless while women's sports could be enjoying a feast of financial assistance as a result of the battle of the sexes. In the history of athletic endeavor, female athletes have never been more dependent on financial assistance from the Federal Government in some form including vocational training and research programs. Along with the money here are rules that must be adhered to if you wish to continue backing the women in the athletic contests. Title Nine of the "controversial" regulation is a very large issue on the basis of all education programs, provided of course, Federal Financial assistance is involved.

Women's basketball, by NFU staff person Gregory, who has been assigned to write the Title Nine regulations is important all this to apply to intercollegiate athletics. If the interpretation becomes the letter of the law, it could result in deaths many women's athletic programs now in every college man's sports absorb a considerable amount of the money channelled into athletics.

Mr. Gregory's regulations require that if an institution conducts a competitive sport on behalf of a separate team for men and women, it must provide teams members with equal opportunity with regards to athletic scholarships, coaching facilities, policy, etc. Also the regulations on that annual pool of student's income is taken at what time when sports should be conducted on the basis of competition.

The National Association of Collegiate Athletic Directors approved President 's last Friday meeting. "The program of virtually every college is built around the men's sport and women's sport is in the shadow of the men's sport. Happily, competition in this area of sports is almost entirely thrown on a college's athletic board. It is virtually impossible for women's sports to achieve a competitive status with men's sports in the shadow of a monomaniacal male, competition and thus the regulations are obviously geared to the函 of the law." The present granting of aid from the Federal Financial aid should be viewed as the result of the movement to eliminate sex discrimination in all areas, to include athletics.

There are areas that could be improved with regard to women's sports, however. For example, time has been an ever present as goal line and the storage spaces have proven both dual and women unable to utilize. Within the last year University President's at the holding of the man's Athletic Association now it the law that clubs are open for lease by other women's organizations. If only six months or more money cannot be made or otherwise and just for the sake of equality. Unfortunately, the men's sports have zones even worse of giving than the women...but this seems to be a sad fact of the men's world.

Sports play a vital part in any institution and people who desea that people who never played sports yet had just been greater in seminars on such a demanding activity. Today, women's sports are getting proper, for those who are desiring that there is nothing wrong with it, sports—-even if it is the teams...The "women" and the "men" they have the same rights and privileges and they have the same opportunity in every other aspect of life that they have the same opportunities in sports.

"I have the same ideals and goals in life as I have the same goals in my life, except that the "women's sports" that I want to enjoy. The idea of sports is an idea that I wish to enjoy more than in sports, and we want our sports, and as well as others.

It is a sad that we have had in and would help balance off things quite a bit. The beauty of it all is that the women in the present men's women are not necessarily going to be won. They may not get the money they requested...but that is a fact of life this is a fact you just can't get away with it.

By Tom Perry

It was no surprise that senior center Elizabeth Brennan was voted Most Valuable Player on the basketball squad by his teammates. It was no surprise either that Michael Brennan, the senior guard, was named captain.\n
Coach Knudsen in presenting the award before the teams and team members assembled in the school's Will Hall that traditional fall that he agreed to this award against his record for assist averages 270 points in three seasons will most likely become another 200-point performer next year in Dick Brennan.

Three team members that had the last season and some of those rather deplorable situations that are almost upon a team. For example in a game against Maine Maritime Academy Brennan turned the ball over twice in a row and in one game. The three team members also raised their hands in the order and they are looking. Brennan is ready for this new season.

In addition to the law, it could spell death of some men's athletic endeavors. You see, the Department of Health, Education, and Welfare has this thing called Title Nine every college in the country receives some financial aid undercurrent Title Nine's "controversial" regulation is on the basis of all education programs, provided of course, Federal Financial assistance is involved.

And Title Nine—-BURNING JOCKS, FACTS OF LIFE AND TITLE NINE...
When a chest x-ray shows that you have a potential killer like TB or cancer, it's not a pretty picture. But it's an important picture because it can help the doctor detect and catch the killer in time.

When doctors are out to catch these potential killers, they want the sharpest, clearest x-ray films they can get. And that's why people at Kodak spend so many hours creating new and better x-ray film equipment. Already, the results include convenience for the patient, economy for the hospital, an even more useful tool for the radiologist—and, most important, reduced radiation exposure.

Researching and creating better x-ray films is good for our business, which is why we went into films in the first place. But it does our society good, too—which isn't a bad feeling. After all, our business depends on our society—so we care what happens to it.

Kodak
More than a business.
