Women’s and gender studies programs are existing in many countries at this time. It is a crucial task for the future of this still emerging discipline to enhance international communication and cooperation between study programs, students, scholars, activists and professionals. If we consider ideals and concepts of emancipation and participation as core principles of women’s and gender studies, global networking requires systematically including non-western perspectives on all levels of research, teaching and curriculum development.

Consequently, the invited speakers at this conference will be from a variety of countries, including Poland, Hungary, India, Nepal, Jordan, Turkey, the Republic of South Africa, Great Britain and the US. They will present inside perspectives of their women’s and gender studies programs: contents and curricula, teaching methods and aims. Furthermore, they will analyze and discuss how societal transition influences the emergence and further development of such programs. Papers will be given by scholars representing women’s and gender studies programs, but also by professionals and activists whose work focus is on women and gender.
The conference aims at investigating and developing possibilities for transnational cooperative initiatives and projects, primarily those involving women’s and gender studies programs.

In 1993 the University of Oldenburg already hosted an international conference on “Women’s Studies im internationalen Vergleich” (“International Perspectives of Women’s Studies”). It was the very first conference dealing with this topic in Germany. At that time we focussed on a) knowing about and learning from women’s studies programs at some of our partner universities (e.g. in the US and in the Netherlands) and b) on bringing together and discussing different attempts to institutionalize women’s studies curricula/ concentrations/ programs at different levels of German higher education.¹

The conference of 2001 goes even further. In the meantime, not only has Oldenburg University institutionalized Women’s and Gender Studies Programs but even some more German institutions of higher education have done so. Others are planning to do so in the near future. The International Women’s University in Hannover, as part of the World Exhibition 2000 in Hannover/ Germany, was a great success. This conference hopes to continue the momentum established by these previous events.

Conference language: English

Conference venue: Main campus, Uhlhornsweg.
All plenary sessions will be held at BIS-Saal, Library.

Please register by 15 May 2001 by mail, fax or e-mail. Your registration will be confirmed by an invoice and instructions for payment together with further information starting on 15 April 2001.
